

WHY WORK FOR WALLBRIDGE?

We are an equal opportunity employer committed to building an exceptional company by fostering a stimulating, engaging, and inclusive workplace where all employees can thrive. We share our vision and values to inspire our team and support our continued growth and success.

Joining our team provides you with the opportunity to join a dynamic exploration company with a multi-million-ounce gold resource base and a robust project pipeline. Our projects span from a PEA-stage development project advancing toward a PFS, a high-potential resource growth asset, and a large, under-explored regional land position located directly along trend from Canada's largest producing gold mine.

Position:	Senior Geotechnician
Location:	Fenelon Project, NW Quebec
Department:	Operation
Schedule:	14/14
Reports to:	Senior Geologist or Designate
Employment Type:	Full-time
AI Disclosure:	Artificial intelligence-assisted technology is not used to screen and assess applications.

KEY DUTIES AND RESPONSIBILITIES:

- Work in accordance with the Company's Health, Safety and Environmental policies, procedures, and standards
- Supervise and coordinate a team of Geotechnicians and core cutters to ensure the safe, efficient, and consistent operation of the Company's drill core processing and logging facility ("core shack")
- Provide training, guidance, and oversight to Geotechnicians and core cutters to ensure adherence to established procedures and best practices for:
 - Handling, opening, transporting, and storing drill core boxes
 - Accurate and consistent collection of drill core data, including meter mark measurements, core orientation, Rock Quality Designation (RQD), magnetic susceptibility measurements, and core photography
 - Entry and QA/QC of geotechnical data within the Company's data management systems
 - Safe operation, upkeep, and routine maintenance of core cutting equipment and core saws
- Sample preparation, packaging, and shipment to analytical laboratories in coordination with site geologists and the Database Geologist
- Maintain accurate records and location tracking of drill core stored within the core storage facility

- Manage the storage, organization, and inventory control of laboratory pulps, rejects, and retained samples
- Conduct routine inspections and inventory checks of equipment, consumables, and supplies required for core processing and sampling activities
- Promote a proactive safety culture through clear communication, hazard awareness, and adherence to safe work practices
- Collaborate closely with geologists and other site personnel to support exploration program objectives
- Review and approve daily safety performance cards, and maintain accurate, complete, and up-to-date records, timesheets, and other operational documentation as required
