Wallbridge Mining Company Limited
2025 Environmental, Social and Governance Report

Wallbridge Mining Company Limited ("Wallbridge" or the "Company") is focused on creating value through the exploration and sustainable development of gold projects in Quebec's Northern Abitibi region while respecting the environment and communities where it operates. The Company holds a contiguous mineral property position that extends along the Detour-Fenelon gold trend. The project is host to the Company's flagship PEA stage Fenelon Gold Project ("Fenelon"), and its earlier exploration stage Martiniere Gold Project ("Martiniere").

DISCLAIMER

This Environmental, Social, and Governance ("ESG") Report (the "ESG Report") has been prepared by Wallbridge for informational purposes only. The information contained herein is based on data and assumptions believed to be accurate and reliable as of the date of publication. However, the Company makes no representation or warranty, express or implied, as to the completeness, accuracy, or timeliness of the information contained in this ESG Report.

Wallbridge's disclosure, including that contained in this ESG Report, may contain forward-looking statements or information (collectively, "FLI") within the meaning of applicable Canadian securities legislation. FLI is based on expectations, estimates, projections and interpretations as of the date of this document.

FLI in this ESG Report may include, but is not limited to, statements regarding the Company's ESG processes, performance, goals, commitments, strategies, expectations, and projections. For further information on
FLI contained in this and other Wallbridge disclosure, please refer to the disclaimers in the Company's public documents and on its website.

This ESG Report does not constitute investment advice or a recommendation to buy or sell any securities of the Company and should not be relied upon as a basis for making investment decisions.

While the Company is committed to sustainable and responsible operating practices, the ESG metrics and frameworks referenced in this ESG Report are evolving and may not be directly comparable to those of other organizations. The ESG data and performance indicators contained herein are subject to continuous improvement and may be revised in future reports to reflect updated methodologies, more robust data collection, or changes in applicable standards and regulations.

Any third-party data or frameworks referenced in this ESG Report are the property of their respective owners and are used for informational purposes only. The Company disclaims any responsibility for the accuracy or completeness of such third-party information.

Information provided in this ESG Report is based on internal processes and assumptions, is not audited, may not conform to Generally Accepted Accounting Principles ("GAAP") and has not been approved by any regulatory or government authority. Neither the Company nor any party involved in the creation of this ESG Report shall be liable for any inaccuracies or omissions or direct, indirect or consequential damages arising from the use of this information. The user assumes all risks associated with using the information contained herein.

Company Profile

Organizational Profile

Name	Wallbridge Mining Company Limited
Describe nature of activities, brands, products and services	Wallbridge is engaged in mineral exploration activities such as drilling, mapping, geophysical surveys, geochemical sampling and various studies (including environmental baseline studies and permitting).
Link to Corporate Website	https://wallbridgemining.com/
Industry Classifications	NAICS: 21222 Gold and silver ore mining 212220 Gold and silver ore mining ISIC: B0729 Mining of other non-ferrous metal ores

Type of Operations	Mining Exploration
Company Headquarters	Ontario, Canada

ESG Accountability

Role of highest authority within the company for Environment, Social and Governance strategy, programs and performance (ONYEN) *Affiliations: IPIECA C2 CCE-1 | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	Chief Executive Officer (CEO)
The name of the highest authority, if applicable	Brian Penny, CPA, CMA

CSDS Sustainability Disclosure Standards Reporting Requirements

Choose the statement of compliance (CSDS 1 1.72)	Not applicable

GRI Reporting Requirements

Choose the statement as to how the organization has aligned their reporting utilizing GRI Standards (GRI 1-3) *Affiliations: GRI "The GRI Standards are used by Onyen Corporation under licensed authority from GRI. GRI, as Licensor of the copyright in the GRI Standards, verified and validated the authentic and accurate representation of the GRI Standards in the Onyen software platform. This verification was limited to ensuring the maintenance of the integrity, authenticity and accuracy of the Licensed Content. GRI therefore makes no implied or actual representations or warranties as to the correctness, compliance, trustworthiness, fitness of purpose or quality of Onyen software or any products resulting therefrom; or of Licensee's use of the GRI copyrighted content; and expressly disclaims any implied or express representations that any report produced by Licensee meets the standards of an approved GRI Standards Report."*	The organization has reported with reference to the GRI Standards for the period defined below

ESG Reporting Period

Unless otherwise noted, all data contained in this report covers the following period (GRI 2-3-a)

Affiliations: CDSB Chapter 2 - How Should Climate-related Matters be Factored into a Company´s Financial Reporting? - 1. IAS 1 - Presentation of Financial Statements | ESRS ESRS 1-73 | IFRS-S1 S1. 22

From	2025-01-01
To	2025-12-31

External Assurance

Has the report been externally assured (GRI 2-5-b) *Affiliations: GRI 102-56 | PRI OO 6 | TCFD Assurance*	No

Financial Reporting Period

Does the financial reporting period align with the sustainability reporting period (e.g. calendar vs fiscal) (GRI 2-3-b) *Affiliations: CDP 1.4 | CSDS 1-64 | ESRS ESRS 1-73, ESRS 2 BP-1-5 (b)-i | IFRS-S1 S1.22*	Yes
Does the financial reporting period align with the sustainability reporting period (e.g. calendar vs fiscal) (CSDS 1 1.64) *Affiliations: CDP 1.4 | ESRS ESRS 1-73, ESRS 2 BP-1-5 (b)-i | GRI 2-3-b | IFRS-S1 S1.22*	Yes
Information about transactions, other events and conditions that occured after the end of the reporting period, but before the date on which the sustainability-related financial disclosures are authorized for issue (CSDS 1 1.68)	Wallbridge evaluates events occurring after the reporting period and before the sustainability disclosures are authorized for issue. Material subsequent events are disclosed where required in accordance with applicable accounting standards and reporting requirements.

Geographic Scope of Report

Unless otherwise noted, the data in this report covers sustainability matters related to the following locations of operations (GRI 2-1-d)	Canada

Affiliations: CDP 1.7

Site map with GPS coordinates

Map 2 - Location within Quebec

Identify notable exclusions of the geographical and/or business scope of the report, and reference of any existing or planned reports that do or will address these (e.g., assets recently divested or acquired, non-managed joint ventures, specific exploration activities, recently closed sites, etc.) (ONYEN) *Affiliations: CDP 1.5 | CDSB Chapter 1 - Section 4: Summary - Climate Change and Financial Reporting Chapter 2 - Section 1: IAS 1 - Presentation of Financial Statements | ESRS ESRS 2 BP-1-5 (a) and (b) i | IPIECA C3 GOV-2*	There are no notable exclusions.

Reporting Practice

Provide a list of all legal entities included in its sustainability reporting (GRI 2-2-a) *Affiliations: CDP 1.5 | CDSB REQ-07 | ESRS ESRS 1-5.1, ESRS 2 BP-1-5 (a) and (b) i | IFRS-S1 S1.20*	Wallbridge Mining Company Limited
Does the organization have audited consolidated financial statements or financial information filed on public record (GRI 2-2-b)	Yes
Is the data and assumptions used in preparing the sustainability-related financial disclosures consistent (to the extent possible considering the requirements of IFRS Accounting Standards or other applicable GAAP) with the corresponding data and assumptions used in preparing the related financial statements. (CSDS 1 1.23) *Affiliations: IFRS-S2 S1.23*	Yes
Provide the full contact details (name, title, address, email and/or phone number) for an individual responsible to address questions regarding the report or its contents (GRI 2-3-d) *Affiliations: GRI 102-53 | PRI OO 11*	Kyle Levac Environmental Superintendent klevac@wallbridgemining.com
Market Capitalization (CUSTOM)	109 Million CAD Market capitalization is reported as at December 31, 2025. The Company's market capitalization changed significantly during the reporting period due to market conditions and corporate developments.

Currency

Unless otherwise noted, all financial figures referenced in this report are in the following currency (ONYEN) *Affiliations: CDP 1.2 | IFRS-S1 S1.24*	CAD

Membership of Associations

List of the industry associations, other membership associations, and national or international advocacy organizations in which the organisation participates in a significant role, as well as any economic, environmental, and social charters, principles, or other programmes that the organisation subscribes to or supports, such as the United Nations Global Compact (UNGC), etc. (GRI 2-28-a) *Affiliations: CDSB REQ-02 | ESRS ESRS 1-11 and MDR-M | GRI 102-13*	The Company subscribes to the UL 2724 ECOLOGO® Certification for Suppliers of Mineral Exploration Industry Programme.

Scale of the Organization

Nature of corporate ownership (GRI 2-1-b) *Affiliations: CDP 1.3*	Publicly owned
Legal form of corporate ownership (GRI 2-1-b)	Incorporated entity

Affiliations: CDP 1.3

Report the quantity of products or services provided during the reporting period and provide description (e.g. number of units produced, amount of primary commodity produced, number of services provided, etc.) (GRI 2-6-b-i) *Affiliations: ESRS ESRS 2 SBM-1-40 (a) i to (a) ii, (b) to (c), SBM-1-42 (c) | GRI 102-7 | WDI Section 11: Supply Chain Transparency - Supply Chain, Subsection 11.2*	Wallbridge is an exploration-stage company and did not produce or sell primary commodities during the reporting period. Activities consisted primarily of mineral exploration, including drilling, geological evaluation, and related technical and environmental studies.

Fragile and Conflict-Affected Situations

Identify all of the entity's countries of operations that align with the World Bank's list of "Fragile and Conflict-Affected Situations" (ONYEN)	None

Mineral Resource Types in Scope

Which of the following mineral resource types are covered by this report (ONYEN) *Affiliations: SASB EM-MM-160a.3 | WEF-MSC Pillar 2: Planet - Resource Availability - Resource Circularity*	• Inferred • Indicated

Mineral Reserve Types in Scope

Which of the following mineral reserve types are covered by this report (ONYEN) *Affiliations: SASB EM-MM-160a.3 | WEF-MSC Pillar 2: Planet - Resource Availability - Resource Circularity*	None

Strategy

Corporate Purpose, Vision, Mission and Values; statements of sustainability/ESG strategy (GRI 2-22-a) *Affiliations: ESRS ESRS 2 SBM-1-40 (g) | GRI 102-16 | IPIECA C2 GOV-1 | WEF-MSC Pillar 1: Principles of Governance - Governing Purpose - Setting Purpose*	COMPANY VISION Vision: To be the leader in advancing quality gold projects in the Northern Abitibi that will generate future value for all stakeholders. Our core values: Caring We care for our employees and the Communities in which we operate, fostering respect, collaboration, and sustainable practices. Focus We are dedicated to creating value through responsible mineral exploration and development that emphasizes safe, socially and environmentally sustainable practices in everything we do. Inclusivity We embrace diversity and foster growth, creating an inclusive environment where everyone can thrive and contribute to shared success. Accountability We take ownership of our actions, commit to excellence, and deliver meaningful results in line with our values. Integrity We act with honesty, transparency, and a steadfast commitment to doing what's right.
Provide a statement from the highest governance body or most senior executive of the organization (i.e., CEO, chair, or equivalent senior position) about the relevance of sustainable development to the organization and its strategy for contributing to sustainable development. (CEO's message for this report) (GRI 2-22-a)	See attached statement.

Affiliations: ESRS ESRS 2 BP-2-17 (a), ESRS 2 SBM-1-40 (g) | GRI 102-14 | IPIECA C2 GOV-1 | WEF-MSC Pillar 1: Principles of Governance - Governing Purpose - Setting Purpose; Stakeholder engagement - Material issues impacting stakeholders

CEO Statement 2025

Material Topics

Governance of Material Topics

Describe the process followed to determine the organization's material topics (GRI 3-1-a) *Affiliations: CSDS C1-3 | ESRS ESRS 2 BP-1-5 (c), ESRS 2 BP-1-AR 1 (a), IRO-1-53 (b) ii to (b) iv | GRI 102-15, 102-44, 13.1-26*	Wallbridge uses SASB Metals & Mining guidance to identify relevant sustainability topics for reporting. A formal materiality assessment has not yet been completed, and the Company will continue refining its approach as the project advances.
How did the organization identify the material topics	Other external sources, please list Material topics were identified using external sustainability guidance, primarily SASB Metals & Mining guidance, together with internal understanding of the Company's exploration-stage activities.
Describe the approach to identify and address grievances, including the grievance mechanisms that the organization has established or participates in (GRI 2-25-b)	Wallbridge maintains a Whistleblower Policy for confidential or anonymous reporting of ethics, compliance and business conduct concerns. Community-related concerns are also addressed through ongoing engagement with Indigenous communities and local stakeholders. Reported concerns are reviewed by appropriate personnel in accordance with internal procedures. Whistleblower Policy
The total number of grievances filed through the mechanism during the reporting period (GRI 2-25-b) *Affiliations: ESRS S1-1-20 (c); S1-3-32 (a), (b) and (e), AR 31, S2-1-17 (c); S2-3-27 (a), (b) and (e), AR 26; S2-4-33 (c), S3-1-16 (c); S3-3-27 (a), (b) and (e), AR 23; S3-4-33 (c), S4-1-16 (c); S4-3-25 (a), (b) and (e), AR 23; S4-4-32 (c)*	0
The number of grievances that were addressed (or reviewed) during the reporting period (GRI 2-25-b) *Affiliations: ESRS S1-1-20 (c); S1-3-32 (a), (b) and (e), AR 31, S2-1-17 (c); S2-3-27 (a), (b) and (e), AR 26; S2-4-33 (c), S3-1-16 (c); S3-3-27 (a), (b) and (e), AR 23; S3-4-33 (c), S4-1-16 (c); S4-3-25 (a), (b) and (e), AR 23; S4-4-32 (c)*	0
Percentage of grievances that were addressed (or reviewed) during the reporting period	Does Not Apply
The number of grievances that were resolved during the reporting period (GRI 2-25-b) *Affiliations: ESRS S1-1-20 (c); S1-3-32 (a), (b) and (e), AR 31, S2-1-17 (c); S2-3-27 (a), (b) and (e), AR 26; S2-4-33 (c), S3-1-16 (c); S3-3-27 (a), (b) and (e), AR 23; S3-4-33 (c), S4-1-16 (c); S4-3-25 (a), (b) and (e), AR 23; S4-4-32 (c)*	0

Percentage of grievances that were resolved during the reporting period	Does Not Apply
The number of grievances that were resolved by remediation (GRI 2-25-b) *Affiliations: ESRS S1-1-20 (c); S1-3-32 (a), (b) and (e), AR 31, S2-1-17 (c); S2-3-27 (a), (b) and (e), AR 26; S2-4-33 (c), S3-1-16 (c); S3-3-27 (a), (b) and (e), AR 23; S3-4-33 (c), S4-1-16 (c); S4-3-25 (a), (b) and (e), AR 23; S4-4-32 (c)*	0

Material Topics - Strategy

Sustainability-related risks and opportunities

Describe the process of identifying sustainability-related risks and opportunities that could reasonably be expected to affect the entity's prospects (CSDS 1 1.54) *Affiliations: ESRS ESRS 2 SBM-3-48 (a) | IFRS-S1 S1.30-a*	Wallbridge identifies sustainability-related risks and opportunities through operational oversight, environmental management, regulatory review, and engagement with Indigenous communities and other stakeholders. Given the Company's exploration stage, this process is primarily qualitative. The Company has not implemented a formal standardized framework or completed formal climate scenario analysis.
Describe sustainability-related risks that could reasonably be expected to affect the entity's prospects (CSDS 1 1.30-a) *Affiliations: ESRS ESRS 2 SBM-3-48 (a) | IFRS-S1 S1.30-a*	Sustainability-related risks that may affect Wallbridge's prospects include health and safety risks, environmental management and compliance, Indigenous and community relations, physical climate factors such as extreme weather and seasonal variability, permitting requirements, geological uncertainty and reliance on external financing.
Specify the time horizons over which the effects of each of those sustainability-related risks could reasonably be expected to occur (CSDS 1 1.30-b) *Affiliations: IFRS-S1 S1.30-b*	• Short term • Medium term • Long term
Describe sustainability-related opportunities that could reasonably be expected to affect the entity' s prospects (CSDS 1 1.30-a) *Affiliations: IFRS-S1 S1.30-a*	Potential sustainability-related opportunities include strengthening relationships with Indigenous communities and local stakeholders, supporting local employment and procurement, improving operational efficiency, demonstrating environmental performance through applicable certification, and maintaining ESG practices that support permitting and access to capital.
Specify the time horizons over which the effects of each of those sustainability-related opportunities could reasonably be expected to occur (CSDS 1 1.30-b) *Affiliations: IFRS-S1 S1.30-b*	• Medium term • Long term • Short term
Explain how does the entity define 'short term', 'medium term' and 'long term' (CSDS 1 1.30-c) *Affiliations: ESRS ESRS 2-BP-9 (a) | IFRS-S1 S1.30-c | IFRS-S2 S2.10-d | TCFD Strategy*	Wallbridge defines short term as up to one year, medium term as approximately one to five years, and long term as beyond five years. These periods align with exploration planning, project evaluation, permitting and potential future development stages.
How are these definitions linked to the planning horizons used by the entity for strategic decision-making (CSDS 1 1.30-c) *Affiliations: IFRS-S1 S1.30-c | IFRS-S2 S2.10-d | TCFD Strategy*	The Company's defined time horizons are aligned with its planning and decision-making processes across different stages of project development. Short-term horizons are used to guide day-to-day operational planning and risk management for exploration activities. Medium-term horizons are aligned with project evaluation, permitting, and strategic planning activities. Long-term horizons are used to consider

	potential project development, including feasibility, construction, and production scenarios. These timeframes support the Company in assessing sustainability-related risks and opportunities in a manner that is consistent with its stage of development and overall project lifecycle.
Business model and value chain	
Describe the current and anticipated effects of sustainability-related risks and opportunities on the entity's business model and value chain (CSDS 1 1.32-a) *Affiliations: ESRS ESRS 2 SBM-3-48 (b) | IFRS-S1 S1.32-a*	Wallbridge's exploration-stage business model may be affected by permitting requirements, environmental compliance, Indigenous and community engagement, climate-related access and logistics constraints, and reliance on contractors and service providers. Effective management of these matters supports exploration planning and potential future project advancement.
Where in the entity's business model and value chain are sustainability-related risks and opportunities concentrated (for example, geographical areas, facilities and types of assets, etc.) (CSDS 1 1.32-b) *Affiliations: ESRS ESRS 2 SBM-3-48 (a) | IFRS-S1 S1.32-b*	These risks and opportunities are primarily concentrated in Quebec exploration activities, including drilling, site access, supporting infrastructure, environmental management, contractors and suppliers, and relationships with Indigenous communities and local stakeholders. Concentrations may change if the projects advance toward development.
Strategy and decision-making	
How has the entity responded to, and plans to respond to, sustainability-related risks and opportunities in its strategy and decision-making (CSDS 1 1.33-a) *Affiliations: IFRS-S1 S1.33-a*	Wallbridge considers sustainability-related risks and opportunities in exploration planning, environmental management, health and safety, community engagement and regulatory compliance. Management reports relevant matters to the Board through the Technical and HSE Committee, and the Company will continue integrating sustainability considerations as project studies advance.
If the entity disclosed response plans in the previous reporting periods, report on the progress against these plans (include quantitative and qualitative information) (CSDS 1 1.33-b) *Affiliations: IFRS-S1 S1.33-b*	Wallbridge has continued to improve ESG-related practices, including maintaining applicable ECOLOGO certification, developing greenhouse gas data, applying operational controls such as anti-idling, continuing site restoration activities, and supporting Indigenous and community engagement. These actions represent ongoing improvements rather than progress against formal targets.
What are the trade-offs between sustainability-related risks and opportunities that the entity considered (CSDS 1 1.33-c) *Affiliations: IFRS-S1 S1.33-c*	Wallbridge considers trade-offs between environmental protection, community engagement, operational efficiency, cost and project timing when planning exploration activities. These considerations are assessed case by case in light of regulatory requirements, operational needs and stakeholder expectations.
Financial position, financial performance and cash flows	
Do you have the capability to provide quantitative metrics about sustainability-related risks and opportunities (CSDS 1 1.40-a) *Affiliations: IFRS-S1 S1.40-a*	No-the effects are not separately identifiable The Company has not quantified the financial

	effects of sustainability-related risks and opportunities, as these effects are not currently separately identifiable at the exploration stage. The Company intends to further develop its approach as project activities advance.
Disclose how sustainability-related risks and opportunities have affected the entity's financial position, financial performance and cash flows for the reporting period (CSDS 1 1.35-a) *Affiliations: ESRS ESRS 2 SBM-3-48 (d) | IFRS-S1 S1.35-a*	Wallbridge has not quantified financial effects from sustainability-related risks and opportunities for the reporting period because these effects are not separately identifiable at the exploration stage. The Company considers such matters qualitatively in risk management, exploration planning, permitting and project evaluation.
Provide quantitative financial metrics (single amount or range) (currency, Thousands)	Not applicable. The Company has not quantified the financial effects of sustainability-related risks and opportunities, as these effects are not separately identifiable at the current stage of its operations.
How does the entity expect its financial position to change over the short, medium and long term, given its strategy to manage sustainability-related risks and opportunities (CSDS 1 1.35-c) *Affiliations: ESRS ESRS 2 SBM-3-48 (e) | IFRS-S1 S1.35-c*	Wallbridge has not quantified anticipated financial effects. Qualitatively, sustainability-related matters may influence exploration costs in the short term, permitting and project evaluation in the medium term, and potential project viability, financing and cost structures over the longer term.
Investment and disposal plans (for example, plans for capital expenditure, major acquisitions and divestments, joint ventures, business transformation, innovation, new business areas, and asset retirements), including plans the entity is not contractually committed to	Wallbridge does not currently have significant committed capital expenditure, acquisition, or disposal plans directly attributable to sustainability-related risks and opportunities. Exploration, environmental management, and community engagement expenditures continue to support responsible project advancement. Sustainability considerations may inform future investment decisions as projects advance.
Planned sources of funding to implement its strategy	Wallbridge may continue funding exploration and related sustainability activities through available corporate funding sources, including equity financing and, where applicable, strategic partnerships. Funding requirements will be assessed as projects and capital needs evolve.
How does the entity expect its financial performance and cash flows to change over the short, medium and long term, given its strategy to manage sustainability-related risks and opportunities (CSDS 1 1.35-d) *Affiliations: ESRS ESRS 2 SBM-3-48 (e) | IFRS-S1 S1.35-d*	Measurement uncertainty primarily relates to estimation methods and data availability, including use of emission factors, discrete environmental sampling, contractor-provided operational data, and assumptions typical of exploration-stage activities.
If disclosing quantitative information, identify the amounts disclosed that are subject to a high level of measurement uncertainty (CSDS 1 1.78-a) *Affiliations: IFRS-S1 S1.78-a*	Not applicable. The Company is not currently disclosing quantitative financial metrics related to sustainability-related risks and opportunities.
What is the sources of measurement uncertainty—for example, the dependence of the amount on the outcome of a future event, on a measurement technique or on the availability and quality of data from the entity's value chain	The primary sources of measurement uncertainty relate to estimation methods and the availability and quality of underlying data. These include the use of standard emission factors in estimating greenhouse gas emissions, variability in environmental monitoring data such as water quality results, and reliance on discrete sampling and limited datasets typical of exploration-stage activities. Additional uncertainty arises from the use of operational data collected from contractors and service providers, as well as assumptions related to future conditions and project

	development. Uncertainty is also influenced by the evolving nature of exploration data and the limited historical datasets available at this stage.
What are the assumptions, approximations and judgements the entity has made in measuring the amounts	Key assumptions and judgments include the use of standard emission factors, interpretation of discrete environmental monitoring results, limited exploration-stage datasets, and reliance on operational information from contractors and service providers.

Resilience

Disclose a qualitative and, if applicable, quantitative assessment of the resilience of the entity's strategy and business model in relation to its sustainability-related risks (CSDS 1 1.41) *Affiliations: ESRS ESRS 2 SBM-3-48 (f) | IFRS-S1 S1.41*	Wallbridge has considered resilience qualitatively in relation to exploration-stage risks such as permitting, Indigenous engagement, environmental constraints, climate-related access issues and access to capital. A formal quantitative resilience assessment has not been completed. The Company maintains some flexibility to adjust exploration programs as conditions change.
How the assessment was carried out	The assessment was qualitative and based on internal review of exploration activities, regulatory requirements, environmental management practices and ongoing engagement. Formal quantitative scenario analysis or stress testing has not been conducted.
Time horizon	The Company defines short term as within one year, medium term as one to five years, and long term as five years and beyond. These time horizons are used to assess the potential impacts of sustainability-related risks and opportunities on its strategy and business model over time. These time horizons align with the Company's exploration activities and anticipated project development pathway.

Material Topics - Management

Metrics and Targets

For each sustainability-related risk and opportunity that could reasonably be expected to affect the entity's prospects, disclose metrics required by an applicable CSDS (CSDS 1 1.46-a)	Wallbridge reports selected exploration-stage metrics, including greenhouse gas emissions, water management, waste management and occupational health and safety indicators. The Company has not completed a formal materiality assessment and does not currently report against all metrics prescribed by specific disclosure standards.
For each sustainability-related risk and opportunity that could reasonably be expected to affect the entity's prospects, disclose metrics the entity uses to measure and monitor that sustainability-related risk or opportunity (CSDS 1 1.46-b-i)	The Company monitors selected metrics relevant to key sustainability-related risks and opportunities associated with its exploration activities. These include, but are not limited to, greenhouse gas emissions (e.g., fuel consumption), water management (e.g., water quality monitoring results), waste management

		(e.g., waste generation and disposal practices), and occupational health and safety (e.g., incident tracking and safety performance indicators). These metrics are used internally to support the monitoring of environmental and operational performance and to inform decision-making at the current stage of development. The Company's approach to metric selection is informed by relevant industry guidance and will continue to evolve as project activities advance.
For each sustainability-related risk and opportunity that could reasonably be expected to affect the entity's prospects, disclose metrics the entity uses to measure and monitor its performance in relation to that sustainability-related risk or opportunity (CSDS 1 1.46-b-ii)		The Company uses selected operational metrics to monitor its performance in managing sustainability-related risks and opportunities associated with its exploration activities. These include tracking fuel consumption and estimated greenhouse gas emissions, water quality monitoring results, waste generation and handling practices, and health and safety performance indicators such as incident frequency. These metrics are reviewed internally to assess performance trends over time and to support decision-making related to environmental management and operational practices. The Company's approach is focused on practical, exploration-stage indicators and will continue to evolve as project activities advance.
	Progress toward any targets the entity has set	Wallbridge has not established formal sustainability-related targets for its exploration activities. No progress against defined targets is therefore reported. The Company may develop measurable objectives as reporting and operational practices mature.
	Any targets it is required to meet by law or regulation	Wallbridge is subject to environmental and occupational health and safety requirements in Canada and Quebec, including regulatory limits and performance criteria related to areas such as water quality, emissions, and workplace safety. The Company is required to comply with these applicable standards and permit conditions; however, it is not currently subject to formal sustainability-related targets established by law or regulation beyond these compliance requirements.
If the metrics are taken from a source other than CSDSs, the entity shall identify the source and the metric taken (CSDS 1 1.49)		Wallbridge uses a combination of internally tracked operational data and selected external guidance to inform its sustainability-related metrics. Greenhouse gas emissions are estimated based on fuel consumption data using standard emission factors. Water management metrics are based on site-specific water quality monitoring results and regulatory sampling requirements. Waste management metrics are derived from operational tracking of waste generation and disposal practices. Occupational health and safety metrics are based on internal incident tracking and reporting systems.

	Where applicable, the selection of these metrics is informed by industry guidance, including SASB Metals & Mining standards; however, the Company does not currently report against a prescribed set of metrics under a specific disclosure standard.
Has a metric been developed by the entity (CSDS 1 1.50)	No
Has the entity set targets to monitor progress toward achieving its strategic goals, or it has targets it is required to meet by law or regulation (CSDS 1 1.51)	No

Measurement Uncertainty

Identify the amounts that the entity has disclosed that are subject to a high level of measurement uncertainty (CSDS 1 1.78-a)	The Company has identified certain disclosed amounts that are subject to a high level of measurement uncertainty, primarily related to estimates used in exploration and environmental data. These include greenhouse gas emissions estimates based on fuel consumption and emission factors, as well as environmental monitoring data such as water quality results, which may vary due to sampling conditions and natural variability. In addition, mineral resource estimates and the valuation of exploration and evaluation properties involve significant assumptions and are inherently subject to uncertainty. These estimates may change as additional information becomes available or as project conditions evolve.
The sources of measurement uncertainty	The primary sources of measurement uncertainty relate to the estimation methods and assumptions used in both environmental and exploration data. Greenhouse gas emissions estimates are subject to uncertainty due to the use of standard emission factors and assumptions related to fuel consumption. Environmental monitoring data, including water quality results, may vary due to sampling conditions, natural variability, and the frequency and scope of data collection. In addition, mineral resource estimates and the valuation of exploration and evaluation properties are subject to uncertainty due to the use of geological interpretations, statistical assumptions, and estimates of future economic conditions. These estimates may change as additional information becomes available.
The assumptions, approximations and judgments the entity has made in measuring the amount	The Company applies a number of assumptions, approximations, and judgments in measuring certain disclosed amounts, particularly in relation to environmental and exploration data.

	Greenhouse gas emissions are estimated based on fuel consumption data and the application of standard emission factors. Environmental monitoring results, including water quality data, are based on discrete sampling and are influenced by assumptions related to sampling frequency, timing, and natural variability. Mineral resource estimates and the valuation of exploration and evaluation properties involve judgments related to geological interpretation, estimation methodologies, and assumptions regarding future economic conditions. These estimates are subject to refinement as additional data becomes available.
Additional information about the sources of and the factors contributing to the uncertainty and other circumstances (CSDS 1 1.81)	The Company's sustainability-related data is subject to uncertainty due to the early stage of its exploration activities and the evolving nature of its data collection processes. Environmental and operational data are based on limited datasets, discrete sampling, and estimation methodologies that may be refined over time as additional information becomes available. Factors contributing to this uncertainty include the variability of environmental conditions, the use of standard assumptions in estimating metrics such as greenhouse gas emissions, and the preliminary nature of mineral resource estimates. As the Company advances its projects, it expects to improve the quality, consistency, and completeness of its data through expanded monitoring, more standardized methodologies, and enhanced reporting practices.

Errors

Are there any material prior period errors that require restating the comparative amounts for the prior period(s) (CSDS 1 1.83)	No No material prior-period errors were identified. During the reporting period, Wallbridge refined its Scope 1 GHG estimation methodology to improve completeness, including additional fuel consumption data. Comparative emissions information was updated to reflect this enhanced methodology and is not treated as correction of a material error.

Environment

Climate Change - Stewardship

Risk Assessments

Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business (GRI 201-2) *Affiliations: Bloomberg CLIMATE_RISKS | CDSB REQ-01, REQ-02, REQ-03, REQ-05, REQ-06 | ESRS ESRS 2 SBM-3-48 (a), (d) to (e), ESRS E1-18; E1-3-26; E1-9-64 | IFRS-S2 S2.10-a | TCFD Strategy | UN SDGs 13 (13.1) | WEF-MSC Pillar 1 (Expanded Metrics & Disclosures) - Principles of Governance - Risk and Opportunity Oversight - Economic, environmental and social topics in capital allocation framework, Pillar 1: Principles of Governance - Risk and Opportunity Oversight - Integrating risk and opportunity into business process*	Other, please specify Wallbridge has not completed a formal climate-related risk assessment under an established reporting framework. The Company recognizes that weather variability, seasonal access, wildfire conditions and evolving regulatory requirements may affect exploration activities and will continue to evaluate these factors as projects advance.

Opportunity Assessments

Have you identified any climate-related opportunities with the potential to have a substantive financial or strategic impact on your business (GRI 201-2-a) *Affiliations: Bloomberg CLIMATE_CHG_OPPORTUNITIES | CDSB REQ-01, REQ-02, REQ-03, REQ-05, REQ-06 | ESRS ESRS 2 SBM-3-48 (a), (d) to (e), ESRS E1-18; E1-3-26; E1-9-64 | GRI 13.2.2, 14.2.2 | IFRS-S2 S2.10-a | SASB FB-AG-440a.1.3 | TCFD Strategy | UN SDGs 13 (13.1) | WEF-MSC Pillar 1 (Expanded Metrics & Disclosures) - Principles of Governance - Risk and Opportunity Oversight - Economic, environmental and social topics in capital allocation framework, Pillar 1: Principles of Governance - Risk and Opportunity Oversight - Integrating risk and opportunity into business process*	No
The amount of assets or business activities aligned with climate-related opportunities (CSDS 2 2.29-d) *Affiliations: IFRS-S2 S2.29-d | TCFD Metrics and Targets*	0.000
The percentage of assets or business activities aligned with climate-related opportunities (CSDS 2 2.29-d) *Affiliations: IFRS-S2 S2.29-d | TCFD Metrics and Targets*	Does Not Apply
The total amount of capital expenditure, financing or investment deployed towards climate-related risks and opportunities (currency, Thousands) (CSDS 2 2.29-e) *Affiliations: IFRS-S2 S2.29-e | TCFD Metrics and Targets*	0.000

Business model and value chain

Describe the current and anticipated effects of climate-related risks and opportunities on the entity's business model and value chain (CSDS 2 2.13-a) *Affiliations: IFRS-S2 S2.13-a | SASB FB-AG-440a.1.3 | TCFD Strategy*	Wallbridge's exploration activities may be affected by physical climate factors such as extreme weather, wildfires, seasonal variability, site access and reliability of supporting infrastructure. Transition risks may arise from evolving emissions and energy requirements as projects advance. Potential opportunities include improved energy efficiency and equipment selection in future studies.
Describe where in the entity's business model and value chain climate-related risks and opportunities are concentrated (for example, geographical areas, facilities and types of assets) (CSDS 2 2.13-b) *Affiliations: IFRS-S2 S2.13-b | TCFD Strategy*	Climate-related risks and opportunities are primarily concentrated in northern Quebec exploration activities, including site access, drilling and support activities, contractors and suppliers, transportation routes and power supply considerations.

Strategy and decision-making

Disclose current and anticipated changes to the entity's business model, including its resource allocation, to address climate-related risks and opportunities (for example, these changes could include plans to manage or decommission carbon-, energy- or water-intensive operations; resource allocations resulting from demand or supply-chain changes; resource allocations arising from business development through capital expenditure or additional expenditure on research and development; and acquisitions or divestments) (CSDS 2 2.14-a-i) *Affiliations: ESRS E1-1-16 (b) | IFRS-S2 S2.14-a-i | TCFD Strategy*	Wallbridge considers climate-related factors in exploration planning and future project studies. Current measures include anti-idling and generator-use controls. As projects advance, the Company may evaluate energy use, emissions reduction opportunities and equipment options as part of technical and economic studies.
Disclose current and anticipated direct mitigation and adaptation efforts (for example, through changes in production processes or equipment, relocation of facilities, workforce adjustments, and changes in product specifications) (CSDS 2 2.14-a-ii) *Affiliations: ESRS E1-1-16 (b) | IFRS-S2 S2.14-a-ii | SASB FB-AG-440a.1.5 | TCFD Strategy*	Current direct measures are limited to exploration-stage operational controls, including anti-idling practices and generator-use controls where appropriate. Climate-related access and weather considerations are considered in exploration planning, and additional measures may be evaluated as projects advance.
Disclose current and anticipated indirect mitigation and adaptation efforts (for example, through working with customers and supply chains); (CSDS 2 2.14-a-iii) *Affiliations: ESRS E1-1-16 (b) | IFRS-S2 S2.14-a-iii | SASB FB-AG-440a.1.5 | TCFD Strategy*	Wallbridge has limited indirect climate mitigation and adaptation activities at the exploration stage and does not currently have significant downstream customer relationships. The Company may consider contractor equipment use and fuel consumption in future supply-chain engagement as projects advance.
Disclose any climate-related transition plan the entity has, including information about key assumptions used in developing its transition plan, and dependencies on which the entity's transition plan relies (CSDS 2 2.14-a-iv) *Affiliations: ESRS E1-1-14; AR-1 | IFRS-S2 S2.14-a-iv | TCFD Strategy*	Wallbridge does not currently have a formal climate transition plan. Climate-related considerations may be assessed in future technical and economic studies, including potential energy sources, equipment options and operational controls appropriate to the Company's stage of development.
How the entity plans to achieve any climate-related targets, including any greenhouse gas emissions targets (CSDS 2 2.14-a-v) *Affiliations: ESRS E1-1-16 (a) | IFRS-S2 S2.14-a-v | TCFD Strategy*	Wallbridge has not established formal climate-related or GHG reduction targets. The Company tracks emissions and applies operational controls such as anti-idling and generator-use practices where appropriate. Formal targets may be considered as data quality and project maturity improve.
Provide information about how the entity is resourcing, and plans to resource, the activities (CSDS 2 2.14-b) *Affiliations: ESRS E1-1-16 (c) | IFRS-S2 S2.14-b | TCFD Strategy*	Climate-related activities are resourced through existing exploration, environmental management and reporting processes, including environmental monitoring, fuel tracking, operational controls and technical support where required. Additional resources may be considered as project studies advance.
Provide quantitative and qualitative information about the progress of plans disclosed in previous reporting periods (CSDS 2 2.14-c) *Affiliations: ESRS E1-1-16-j | IFRS-S2 S2.14-c | TCFD Strategy*	As an exploration-stage company, the Company has not previously disclosed formal climate-related plans. As such, progress is reflected through ongoing operational practices and incremental improvements rather than against defined plans or targets. During the reporting period, the Company continued to implement operational measures to manage energy consumption and emissions, including anti-idling practices and generator use controls. The Company also continued to evaluate climate-related considerations in project planning, including potential energy use and emissions reduction opportunities as part of ongoing technical studies. These activities represent ongoing progress in integrating climate-related considerations into operations, with the Company expecting to further develop its approach as projects advance.

Financial position, financial performance and cash flows

Disclose the effects of climate-related risks and opportunities on the entity's financial position, financial performance and cash flows for the reporting period (current financial effects) (CSDS 2 2.15-a) *Affiliations: IFRS-S2 S2.15-a | TCFD Strategy*	Wallbridge has not identified material current financial effects from climate-related risks or opportunities during the reporting period. At the exploration stage, such effects are not separately identifiable in financial position, performance or cash flows.
Disclose the anticipated effects of climate-related risks and opportunities on the entity's financial position, financial performance and cash flows over the short, medium and long term, taking into consideration how climate-related risks and opportunities are included in the entity's financial planning (anticipated financial effects) (CSDS 2 2.15-b) *Affiliations: ESRS E1-9-64 | IFRS-S2 S2.15-b | TCFD Strategy*	Wallbridge has not quantified anticipated climate-related financial effects. Qualitatively, climate-related matters may influence exploration logistics and costs, permitting and project evaluation, and future energy, regulatory, infrastructure and financing considerations if projects advance.
Disclose quantitative and qualitative information about how climate-related risks and opportunities have affected its financial position, financial performance and cash flows for the reporting period (CSDS 2 2.16-a) *Affiliations: IFRS-S2 S2.16-a | TCFD Strategy*	The Company is in the exploration stage and has not identified material current financial effects from climate-related risks or opportunities during the reporting period. Climate-related factors have not had a significant or separately identifiable impact on the Company's financial position, financial performance, or cash flows for 2025. While the Company monitors potential climate-related risks, including weather variability and regulatory developments, these have not resulted in measurable financial impacts to date. Accordingly, no quantitative financial information is currently disclosed, and the Company's assessment of climate-related financial effects remains qualitative in nature.
Disclose quantitative and qualitative information about the climate-related risks and opportunities identified above for which there is a significant risk of a material adjustment within the next annual reporting period to the carrying amounts of assets and liabilities reported in the related financial statements (CSDS 2 2.16-b) *Affiliations: IFRS-S2 S2.16-b | TCFD Strategy*	The Company has not identified any climate-related risks or opportunities that are expected to result in a material adjustment to the carrying amounts of assets and liabilities within the next annual reporting period. This reflects the Company's current exploration-stage activities, where climate-related factors are not expected to have a direct and material impact on recognized assets and liabilities in the near term.
How the entity expects its financial position to change over the short, medium and long term, given its strategy to manage climate-related risks and opportunities (CSDS 2 2.16-c) *Affiliations: IFRS-S2 S2.16-c | TCFD Strategy*	The Company has not quantified the anticipated financial effects of climate-related risks and opportunities; however, these factors are expected to influence its financial position over time. In the short term, climate-related factors are not expected to have a significant impact on the Company's financial position, as activities remain focused on exploration. In the medium term, climate-related considerations may influence project evaluation, permitting timelines, and capital allocation decisions, which could affect the timing and level of expenditures. In the long term, climate-related risks and opportunities are expected to play an increasing role in project development, including potential impacts on energy use, regulatory requirements, cost structures, and access to financing.

	These considerations are incorporated qualitatively into the Company's planning processes as it advances its projects and evaluates future development scenarios.
Does the entity have investment and disposal plans (for example, plans for capital expenditure, major acquisitions and divestments, joint ventures, business transformation, innovation, new business areas, and asset retirements), including plans the entity is not contractually committed to	As an exploration-stage company, Wallbridge's investment activities are primarily focused on advancing its gold projects through exploration and technical studies. Capital expenditures are directed toward drilling programs, environmental management, and project evaluation activities. The Company does not currently have significant asset disposals; however, it may enter into option agreements, joint ventures, or other strategic arrangements to advance or monetize certain properties, as demonstrated by the option agreement related to the N2 property. In accordance with Quebec regulatory requirements, the Company maintains a closure plan for its projects and has provided financial assurance to cover estimated site restoration and rehabilitation costs. These obligations are reviewed and updated periodically as part of the Company's regulatory compliance framework. As projects progress, the Company expects that future investment decisions may increasingly incorporate climate-related considerations, including energy use, emissions management, and infrastructure planning.
Does the entity have planned sources of funding to implement its strategy	Wallbridge expects to fund the implementation of its strategy, including climate-related activities, through equity financing and, where applicable, strategic partnerships. As an exploration-stage company, funding is primarily directed toward exploration programs, environmental management, and project evaluation activities. The Company has historically accessed capital markets to support its operations and expects to continue to rely on similar sources of funding as its projects advance. Climate-related considerations are incorporated into project planning and are expected to be addressed within the Company' s broader funding and capital allocation

	decisions as part of future development activities.
How does the entity expects its financial performance and cash flows to change over the short, medium and long term, given its strategy to manage climate-related risks and opportunities (for example, increased revenue from products and services aligned with a lower-carbon economy; costs arising from physical damage to assets from climate events; and expenses associated with climate adaptation or mitigation) (CSDS 2 2.16-d) *Affiliations: IFRS-S2 S2.16-d | TCFD Strategy*	Wallbridge has not quantified the anticipated effects of climate-related risks and opportunities on its financial performance and cash flows; however, these factors are expected to influence outcomes over time. In the short term, climate-related factors are not expected to have a significant impact on financial performance or cash flows, as the Company remains in the exploration stage. In the medium term, climate-related considerations may influence project evaluation, permitting timelines, and capital allocation decisions, which could affect the timing and level of expenditures. In the long term, climate-related risks and opportunities are expected to play an increasing role in project development, including potential impacts on energy use, regulatory requirements, cost structures, and access to financing. These factors may influence the Company's financial performance and cash flow generation as projects advance toward potential production. These considerations are incorporated qualitatively into the Company's planning processes and future development evaluations.
Explain why the entity has not provided quantitative information, if it determines that it need not provide quantitative information about the current or anticipated financial effects of a climate-related risk or opportunity (CSDS 2 2.21-a) *Affiliations: IFRS-S2 S2.21-a*	Quantitative information has not been provided because climate-related effects are not currently separately identifiable within Wallbridge's financial results at the exploration stage. The Company continues to consider these matters qualitatively in planning and risk management.
Provide qualitative information about those financial effects, including identifying line items, totals and subtotals within the related financial statements that are likely to be affected, or have been affected, by that climate-related risk or opportunity, if quantative information is not disclosed (CSDS 2 2.21-b) *Affiliations: IFRS-S2 S2.21-b*	Wallbridge has identified that climate-related risks may affect certain financial statement line items, although no material impacts have been recognized to date. Potential qualitative impacts may include changes in exploration and evaluation expenditures and operating expenses due to weather-related disruptions, site access constraints, and environmental management requirements. Climate-related factors may also influence the timing and level of capital expenditures associated with project advancement, as well as

	broader cash flow requirements related to exploration activities. In future development stages, climate-related considerations may affect costs associated with energy use, regulatory compliance, and infrastructure planning, which could influence the carrying value of exploration and evaluation assets and future property, plant and equipment. At the current stage of operations, these effects have not resulted in material or separately identifiable impacts on the Company's financial statements.
Provide quantitative information about the combined financial effects of that climate-related risk or opportunity with other climate-related risks or opportunities and other factors unless the entity determines that quantitative information about the combined financial effects would not be useful, if quantitative information is not disclosed (CSDS 2 2.21-c) *Affiliations: IFRS-S2 S2.21-c*	Not applicable. The Company is not currently disclosing quantitative financial information related to the effects of climate-related risks and opportunities.

Climate resilience

What are the implications, if any, of the entity's assessment for its strategy and business model, including how the entity would need to respond to the effects identified in the climate-related scenario analysis (CSDS 2 2.22-a-i) *Affiliations: IFRS-S2 S2.22-a-i | TCFD Strategy*	Wallbridge has not completed formal climate scenario analysis or fully evaluated climate-related financial impacts. Potential physical and transition considerations include extreme weather, wildfire conditions, seasonal access, water availability, energy use and evolving regulatory requirements. These matters may be considered in future project studies as appropriate.
What are the significant areas of uncertainty considered in the entity's assessment of its climate resilience (CSDS 2 2.22-a-ii) *Affiliations: ESRS E1.SBM-3-AR-8-a | IFRS-S2 S2.22-a-ii | TCFD Strategy*	Wallbridge has not yet evaluated climate-related risks with the potential to have a substantive financial or strategic impact on its business. The Company acknowledges that its future operations may be energy intensive and recognizes climate change as an international and community concern. Identified potential physical impacts include extreme weather events, increased frequency and intensity of wildfires, changes in rainfall patterns, water shortages, energy disruptions, changing temperatures, effects on boreal caribou populations, supply chain implications, compliance issues, increased costs and reduced productivity. While the Company will review processes to reduce its carbon footprint in future economic studies, such as electric battery powered mining equipment, and will continue to take measures to manage energy use, increasing legislation and regulations relating to emission levels and energy efficiency may result in increased costs at future operations and could adversely impact the Company's financial condition and results of operations.
What is the entity's capacity to adjust or adapt its strategy and business model to climate change over the short, medium and long term, including: (CSDS 2 2.22-a-iii) *Affiliations: ESRS E1.SBM-3-AR-8-b | IFRS-S2 S2.22-a-iii | TCFD Strategy*	Wallbridge's ability to adapt to climate-related matters is influenced by its exploration-stage status, available capital and future project development decisions. Current flexibility is primarily through exploration planning and

	operational controls. Broader adaptation measures would depend on project advancement, technical studies and financing availability.
The availability of, and flexibility in, the entity's existing financial resources to respond to the effects identified in the climate-related scenario analysis, including to address climate-related risks and to take advantage of climate-related opportunities	The Company has limited financial flexibility to adapt its strategy in response to climate-related impacts. As an exploration-stage company with no current revenue-generating operations, the Company does not expect to receive revenues from operations in the foreseeable future and expects to incur losses until one or more of its properties enters into commercial production. The Company's ability to respond to climate-related risks and opportunities is dependent on its capacity to secure additional capital financing, which remains uncertain. While management believes it has sufficient cash resources to meet its obligations and fund planned expenditures for at least the next twelve months, there is no assurance that adequate financing will be available in the future or on acceptable terms. The Company will need to raise funds to finance the advancement of its exploration and development activities and meet future expenditures. During future operations, the Company plans to review numerous processes to reduce its carbon footprint through measures such as electric battery-powered mining equipment and operational controls including anti-idling policies and limiting generator use. However, the Company acknowledges that emerging legislation and regulations relating to emission levels and energy efficiency may result in increased costs at future operations, which could have an adverse impact on the Company's financial condition.
What is the entity's ability to redeploy, repurpose, upgrade or decommission existing assets	The Company is currently in the exploration and evaluation stage of its operations and has not yet commenced commercial production. The Company's ability to adjust its strategy and business model to climate change is supported by its commitment to review numerous processes to reduce its overall carbon footprint in future economic studies, such as the use of electric battery-powered mining equipment. As the Company advances toward potential development and operations, it plans to incorporate climate resilience considerations into project design and operational planning. The Company maintains operational controls and procedures to manage energy consumption and emissions, including anti-idling policies and limiting generator use to applicable office hours during summer months. Should climate change impacts or regulatory requirements necessitate changes to operational approaches, the Company's exploration-stage operations provide flexibility to integrate climate adaptation measures into future mine development decisions and capital expenditure planning before commercial production commences.
What is the effect of the entity's current and planned investments in climate-related mitigation, adaptation and opportunities for climate resilience	Wallbridge Mining Company Limited's current investments in climate-related mitigation and adaptation are limited to operational measures implemented during exploration activities, such as managing fuel use and energy consumption.

	These measures primarily support operational efficiency and cost management rather than driving material changes in financial performance at the current stage. Planned investments, including the evaluation of energy use, emissions reduction opportunities, and equipment selection in future technical and economic studies, are expected to influence project design and long-term cost structures as projects advance. As a result, the effect of current and planned climate-related investments is primarily qualitative, supporting improved operational practices in the short term and informing future development decisions and potential cost efficiencies over the medium and long term.
Risk management: Processes and policies	
Provide information about the inputs and parameters the entity uses (for example, information about data sources and the scope of operations covered in the processes) (CSDS 2 2.25-a-i) *Affiliations: IFRS-S2 S2.25-a-i | TCFD Strategy*	Climate-related disclosures are based on available exploration-stage operational data, including fuel consumption, drilling activity, environmental monitoring, waste information and applicable emission factors. The scope covers exploration and related site activities during the reporting period.
Provide information about whether and how the entity uses climate-related scenario analysis to inform its identification of climate-related risks (CSDS 2 2.25-a-ii) *Affiliations: IFRS-S2 S2.25-a-ii | TCFD Strategy*	Wallbridge has not used formal climate-related scenario analysis. Climate-related risks are identified qualitatively through operational experience, environmental management, regulatory review and site planning considerations.
Provide information about how the entity assesses the nature, likelihood and magnitude of the effects of those risks (for example, whether the entity considers qualitative factors, quantitative thresholds or other criteria) (CSDS 2 2.25-a-iii) *Affiliations: IFRS-S2 S2.25-a-iii | TCFD Strategy*	Wallbridge assesses climate-related risks qualitatively, considering potential effects on site access, logistics, wildfire exposure, seasonal conditions, energy use and regulatory requirements. Assessment is supported by management oversight and Board-level reporting through the Technical and HSE Committee.
Provide information about whether and how the entity prioritises climate-related risks relative to other types of risk (CSDS 2 2.25-a-iv) *Affiliations: IFRS-S2 S2.25-a-iv | TCFD Strategy*	Climate-related risks are considered alongside other operational, environmental, regulatory, community and financial risks relevant to exploration activities. Prioritization remains qualitative and is addressed through existing management and Board oversight processes.
Provide information about how the entity monitors climate-related risks (CSDS 2 2.25-a-v) *Affiliations: IFRS-S2 S2.25-a-v | TCFD Strategy*	Wallbridge monitors climate-related considerations through exploration planning, environmental management, review of weather and seasonal access conditions, wildfire awareness, energy-use tracking and regulatory monitoring.
Provide information about whether and how the entity has changed the processes it uses compared with the previous reporting period (CSDS 2 2.25-a-vi) *Affiliations: IFRS-S2 S2.25-a-vi | TCFD Strategy*	The Company has not made significant changes to the processes used to identify, assess, monitor, and manage climate-related risks compared with the previous reporting period. The Company continues to apply qualitative assessment processes supported by operational oversight, environmental management activities, and governance oversight through management and the Board's Technical and HSE Committee. The Company continues to refine its

	sustainability-related data collection and reporting practices as its disclosure processes evolve.
What is the processes the entity uses to identify, assess, prioritise and monitor climate-related opportunities, including information about whether and how the entity uses climate-related scenario analysis to inform its identification of climate-related opportunities (CSDS 2 2.25-b) *Affiliations: IFRS-S2 S2.25-b | TCFD Strategy*	Wallbridge considers potential climate-related opportunities qualitatively through operational planning and project evaluation. Opportunities may include energy efficiency, fuel-use management and equipment options assessed in future studies. Formal scenario analysis has not been used.
What is the extent to which, and how, the processes for identifying, assessing, prioritising and monitoring climate-related risks and opportunities are integrated into and inform the entity's overall risk management process (CSDS 2 2.25-c) *Affiliations: IFRS-S2 S2.25-c | TCFD Strategy*	Climate-related considerations are addressed within existing environmental, operational, regulatory and corporate risk management processes. At this stage, integration is qualitative and reflects the Company's exploration-stage activities.

Climate-related targets

Has the entity set climate-related targets (note: details specific to GHG targets disclosures are under Scope 1, 2 and 3) (CSDS 2 2.33) *Affiliations: IFRS-S2 IFRS-S2 | TCFD Metrics and Targets*	No

Greenhouse Gas Emissions

Scope 1

Provide the total company calculated gross Scope 1 GHG emission amount (tonnes CO-e) and a description of methodology in the details (GHG Protocol) *Affiliations: Bloomberg GHG_SCOPE_1 | CDP C6, C7 | CDSB REQ03, REQ04 | ESRS E1-4-34 (a) and (b); E1-6-44 (a); 46; 50; AR 25 (b) and (c); AR 39 (a) to (d); AR 40; AR 43 (c) to (d) | GRI 13.1.2, 14.1.5 | IFRS-S2 EM-EP-110a.1, EM-MD-110a.1, EM-RM-110a.1, S2.29-a-i, S2.29-a-i-(1) | IPIECA A1 CCE-4, C1 CCE-4, C3 CCE-4 | SASB EM-EP-110a.1, EM-MD-110a.1, EM-MM-110a.1.1, EM-RM-110a.1, FB-AG-110a.1, IF-EU-110a.1 | TCFD Metrics and Targets | UN SDGs 12 (12.1), 12 (12.2), 13 (13.2), 13 (13.3), 14 (14.3), 8 (8.4), 9 (9.2), 9 (9.4)*	2,258.210
Carbon dioxide (CO) (tonnes)	2,240.840
Methane (CH) (tonnes CO-e)	10.380
Nitrous oxide (NO) (tonnes CO-e)	6.990
Hydrofluorocarbon (CHFs) (tonnes CO-e)	0.000
Perfluorocarbons (PFCs) (tonnes CO-e)	0.000
Sulphur hexafluoride (SF) (tonnes CO-e)	0.000
The total amount of gross global Scope 1 GHG emissions (CO-e) (tonnes) (GHG Protocol) *Affiliations: Bloomberg GHG_SCOPE_1 | ESRS E1-4-34 (b); E1-6-44 (a); 46; 50; AR 25 (b) and (c); AR 39 (a) to (d); AR 40; AR 43 (c) to (d) | GRI 102-5-a, 14.1.5, 305-1 | IFRS-S2 EM-EP-110a.1, EM-MD-110a.1, EM-MM-110a.1.1, EM-RM-110a.1, S2.32 | IPIECA A1 CCE-4, C1 CCE-4, C3 CCE-4 | SASB EM-EP-110a.1, EM-MD-110a.1, EM-RM-110a.1, FB-AG-110a.1, IF-EU-110a.1 | TCFD Metrics and Targets | UN SDGs 12 (12.1), 12 (12.2), 13 (13.2), 13 (13.3), 14 (14.3), 8 (8.4), 9 (9.2), 9 (9.4) | WEF-MSC Pillar 2: Planet - Climate Change - Greenhouse Gas (GHG) Emissions & TCFD implementation*	2,258.210
Which greenhouse gases are covered by the target	• Carbon dioxide (CO2) • Methane (CH4) • Nitrous oxide (N2O)
Was the target derived using a sectoral decarbonisation approach	No

Gross greenhouse gas emissions target	No
Net greenhouse gas emissions target (note: disclose separately the associated gross greenhouse gas emissions target)	No

Scope 2

If company specific calculations are not available, provide information following the gross location-based energy indirect (Scope 2) global greenhouse gas (GHG) emissions approach: (GHG Protocol)

Affiliations: CDP C7 | CDSB REQ02, REQ04 | GRI 13.1.3, 14.1.6, 305-2 | IFRS-S2 S2.29-a-i-(2) | IPIECA C2 CCE-4, C3 CCE-4 | TCFD Metrics and Targets | UN SDGs 12 (12.4), 13 (13.1), 14 (14.3), 15 (15.2), 3 (3.9) | WEF-MSC Pillar 2: Planet - Climate Change - Greenhouse Gas (GHG) Emissions & TCFD implementation

Biodiversity

Management Plan

Describe the environmental and biodiversity management plan(s) implemented at active sites (SASB EM-MM-160a.1) *Affiliations: IPIECA C1 ENV-3 | SASB EM-EP-160a.1.1 | UN SDGs 11 (11.4), 12 (12.1), 12 (12.2), 12 (12.4), 12 (12.5), 14 (14.1), 14 (14.2), 14 (14.3), 15 (15.3), 15 (15.4), 15 (15.5), 15 (15.9), 15 (15.a), 6 (6.3), 8 (8.4), 9 (9.2), 9 (9.4)*	Wallbridge applies environmental and biodiversity management practices for exploration activities in Quebec, including wildlife and habitat protection, water and waste management, spill prevention, hazardous materials management, environmental monitoring, and caribou-related mitigation where applicable. Practices are guided by applicable Quebec requirements and site-specific procedures. Additional controls may be developed as project activities advance.
Lifecycle stages to which the plan(s) apply	Exploration and appraisal
The topics addressed by the plan(s)	• Ecological and biodiversity impacts • Waste generation • Discharges to water • Natural resource consumption • Hazardous chemical usage
The underlying references for its plan(s), including whether they are codes, guidelines, standards, or regulations; whether they were developed by the entity, an industry organization, a third-party organization (e.g., a non-governmental organization, a governmental agency, or some combination of these groups)	Environmental and biodiversity practices are guided by applicable Quebec legislation, regulations and guidance relevant to exploration activities, including the Mining Act, Directive 019 and requirements related to forest and wildlife protection. Site-specific procedures support implementation where applicable.

Impacts

Does access to the site involve traversing a protected area (ONYEN) *Affiliations: CDP W8 | SASB EM-MM-160a.3*	Yes
Do any of the entities concessions share a watershed with a protected area (ONYEN) *Affiliations: CDP W8 | SASB EM-MM-160a.3*	Yes
Percentage of proven reserves in sites with protected conservation status or in areas of endangered species habitat (SASB EM-MM-160a.3.1) *Affiliations: GRI 304-1,304-2, 304-3 | SASB EM-EP-160a.3.1 | UN SDGs 11 (11.4), 12 (12.1), 12 (12.2), 12 (12.4), 12 (12.5), 14 (14.1), 14 (14.2), 14 (14.3), 15 (15.3), 15 (15.4), 15 (15.5), 15 (15.9), 15 (15.a), 6 (6.3), 8 (8.4), 9 (9.2), 9 (9.4) | WEF-MSC Pillar 2: Planet - Nature Loss - Land Use and Ecological Sensitivity*	Does Not Apply

Conflict-affected and high-risk areas

Adherence to Laws and Due Diligence

Describe the approach to ensuring adherence to international humanitarian law when operating in conflict-affected and high-risk areas (GRI 14.25.1)	Not applicable. Wallbridge Mining Company Limited's exploration activities are conducted in Quebec, Canada, and the Company does not operate in conflict-affected or high-risk areas.

Security, Human Rights and Rights of Indigenous People

Describe the nature of any social risks, for all operating countries, that could have a material impact on the operations (ONYEN) *Affiliations: SASB EM-MM-210a.3*	Wallbridge did not identify material social risks that had a substantive impact on operations during the reporting period. The Company continues to manage Indigenous engagement, community relations, workforce health and safety, and social license considerations as part of its exploration activities.
Percentage of proven reserves that are located in or near areas of active conflict (SASB EM-MM-210a.1.1) *Affiliations: SASB EM-EP-210a.1.1 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Does Not Apply

The total amount of proven reserves	0.000
Percentage of probable reserves that are located in or near areas of active conflict (SASB EM-MM-210a.1.2) *Affiliations: SASB EM-EP-210a.2 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Does Not Apply
The total amount of probable reserves	0.000
Which indigenous rights of communities in which the entity operates or intends to operate are respected, provide a description of the entity's due diligence practices and procedures in the details. (SASB EM-MM-210a.3.1) *Affiliations: SASB EM-EP-210a.3 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	• The establishment of formal community agreements • Other, please specify Regular PDA meetings with Cree Nation and Abitibiwinni
Which human rights procedures the entity's due diligence practices include, provide description in the details (SASB EM-MM-210a.3.2) *Affiliations: SASB EM-EP-210a.3 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Other, please specify Human rights considerations are addressed through Wallbridge's Code of Business Conduct and Ethics, Whistleblower Policy, workplace conduct expectations, health and safety practices, Indigenous engagement, and regulatory compliance activities applicable to exploration in Quebec.

Community Relations

Programs

Report on community relations programs, objectives and achievements in the past 3 years (ONYEN)	Wallbridge maintains ongoing engagement with First Nations partners and local stakeholders. Recent initiatives include the site cultural center opened in June 2024, ongoing agreement-related discussions, local and Indigenous employment and procurement efforts where possible, and Cultural Awareness Program training for employees and contractors.

Risks

Discuss processes, procedures, and practices to manage risks and opportunities associated with the rights and interests of communities in areas where it conducts business (SASB EM-MM-210b.1.1) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.3 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Wallbridge manages community-related risks and opportunities through ongoing engagement with Indigenous communities and local stakeholders, agreement-related processes, senior management involvement where concerns arise, and local employment, procurement and cultural awareness initiatives where appropriate.
Economic rights and interests, including, but not limited to, employment, fair wages, payment transparency, national resource governance, and respect of infrastructure and agricultural land	Wallbridge supports local and Indigenous economic participation where possible by sharing employment opportunities with community partners and considering qualified local and Indigenous candidates, contractors and suppliers. The Company also communicates with community partners regarding work opportunities and allocation practices.

Environmental rights and interests, including, but not limited to clean local air and water, as well as safe discharge and disposal of waste	Wallbridge manages environmental considerations through water protection, dust management, waste management and monitoring practices in accordance with applicable permits and regulatory requirements, including Directive 019 where applicable. Surface water protection measures are implemented in accordance with Quebec's Directive 019 and applicable provincial and federal regulatory requirements. The Company also implements dust management measures to support air quality protection at active exploration sites. Environmental sampling and monitoring programs, including water quality monitoring and waste management activities, are conducted in accordance with applicable provincial and federal regulations and permit requirements.
Lifecycle stages to which the entity's practices apply, if relevant (SASB EM-MM-210b.1.2) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.3 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Exploration and appraisal
The underlying references for the entity's procedures, including whether they are codes, guidelines, standards, or regulations and whether they were developed by the entity, an industry organization, a third-party organization (e.g., a non-governmental organization), a governmental agency, or some combination of these groups (SASB EM-MM-210b.1.2) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.3 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Community engagement practices are informed by applicable agreements with Indigenous communities, internal procedures, regulatory requirements and Cultural Awareness Program training requirements.
Risks associated with community relations include: (SASB EM-MM-210b.1.3) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.3 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	• Non-technical delays • Availability and development of local content • Availability and access to adequate infrastructure • Access to land

Opportunities

Lifecycle stages to which its practices apply, if relevant (SASB EM-MM-210b.1.2)	Exploration and appraisal
Opportunities associated with community relations include: (SASB EM-MM-210b.1.3) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.3 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	• Increased social support • Improved skills of local labour • Small business development based on local procurement

Risks and Opportunities

Describe efforts to eliminate or mitigate community risks and/or address community concerns: (SASB EM-MM-210b.1.6) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.16 | GRI 201-1, 201-4 | IPIECA C3 CCE-1 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	
Identify and describe country risks specific to the entity's projects and unique operating context (SASB EM-MM-210b.1.7) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.28 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Wallbridge operates in Quebec, Canada, where exploration and potential future development activities are subject to evolving environmental, regulatory, Indigenous engagement, and permitting requirements. Risks associated with the Company's operating context include permitting timelines, seasonal access constraints, infrastructure availability, environmental protection requirements, changing regulatory expectations related to climate change and biodiversity, and the need to maintain constructive relationships with Indigenous communities and local

	stakeholders. The Company manages these risks through ongoing community engagement, environmental management programs, compliance with applicable provincial and federal regulations, and operational planning intended to support responsible exploration activities and long-term project development.
Which country risk classification has your organisation used	Not Applicable
Provide details about country, regional, community and site risks and/or the discussion of specific projects: (SASB EM-MM-210b.1.7) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.29 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	Wallbridge's Quebec exploration activities are subject to risks related to permitting, seasonal access, infrastructure availability, environmental protection, biodiversity considerations, regulatory requirements and maintaining constructive relationships with Indigenous communities and local stakeholders.
Specific risks	• Not Applicable • Regulation • Labour force (skills) availability • Resettlement and access to land • Quality of access to infrastructure (e.g., ports, roads, shipping channels) • General license to operate • Stability of the local market
Quantify the reduction in risk according to the methods described above (change in Value at Risk) (SASB EM-MM-210b.1.7) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.30 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	0 Wallbridge Mining Company Limited has not quantified reductions in community-related risk through a formal Value at Risk (VaR) methodology. The Company currently manages and mitigates community-related risks through ongoing engagement with Indigenous communities and local stakeholders, Pre-Development Agreements, environmental management practices, Cultural Awareness Program training, and community relations initiatives rather than through formal financial risk quantification models.
Disclose the total number of site shutdowns or project delays due to non-technical factors (SASB EM-MM-210b.2.1) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.32 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	0
Disclose the total aggregate duration (in days) of site shutdowns or project delays due to non-technical factors (SASB EM-MM-210b.2.1) *Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.32 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)*	0
Discuss specific delays including associated costs, root cause and corrective actions for resolved delay, and status of ongoing delays (SASB EM-MM-210b.2.4)	N/A

Affiliations: CDP C2.3, C2.4, C3.1, W3.3, W4.1, W4.2, W4.32 | GRI 201-1, 201-4 | UN SDGs 1 (1.4), 11 (11.4), 16 (16.a)

Governance

Delegation of responsibility for managing impacts

Has the highest governance body appointed any senior executives with responsibility for the management of organization's impacts on the economy, environment and people (e.g., is it part of the Governance structure of the company, CEO's role, CFO's role, Sustainability Executive, etc.) (GRI 2-13-a-i) *Affiliations: CDSB REQ-01 | ESRS ESRS 2 GOV-1-22 (c) i; GOV-2-26 (a), G1-3-18 (c) | GRI 102-22, 405-1 | IFRS-S1 S1.27-a | IPIECA A1 GOV-1, C1 GOV-1*	Yes The CEO is responsible for the management of the organization's progress and performance on sustainability issues.
Has the highest governance body delegated responsibility for the management of impacts to other employees (GRI 2-13-a-ii) *Affiliations: CDSB REQ-01 | ESRS ESRS 2 GOV-1-22 (c) i; GOV-2-26 (a), G1-3-18 (c) | GRI 102-19, 405-1 | IFRS-S1 S1.27-a | IPIECA A1 GOV-1, C1 GOV-1*	Yes
Describe the process for senior executives or other employees to report back to the highest governance body on the management of the organization's impacts on the economy, environment and people, including sustainability-related risks and opportunities (GRI 2-13-b) *Affiliations: ESRS ESRS 2 GOV-1-22 (c) i; GOV-2-26 (a), G1-3-18 (c) | IFRS-S1 S1.27-a-iii | WEF-MSC Pillar 1 (Expanded Metrics & Disclosures) - Principles of Governance - Risk and Opportunity Oversight - Economic, environmental and social topics in capital allocation framework*	The Technical and HSE Committee provides Board-level oversight of ESG matters and receives quarterly management reports on environmental, health and safety, community, and sustainability-related matters. Material issues are escalated as required.
Frequency for senior executives or other employees to report back to the highest governance body on the management of the organization's impacts (GRI 2-13-b)	Quarterly

Governance Body

Identify the governance body(ies) (board, committee or equivalent body charged with governance) or individual(s) responsible for oversight of sustainability-related risks and opportunities (CSDS 1 1.27-a)	The Board has overall oversight of sustainability-related risks and opportunities. The Technical and HSE Committee supports this oversight through quarterly management reporting, while the CEO and senior management are responsible for day-to-day management of relevant matters.
How responsibilities for sustainability-related risks and opportunities are reflected in the terms of reference, mandates, role descriptions and other related policies applicable to the governance body or individual(s) (CSDS 1 1.27-a-i) *Affiliations: ESRS ESRS 2 GOV-1-22 (a) and (b) | IFRS-S1 S1.27-a-i*	Sustainability-related responsibilities are reflected through Board and committee oversight, management reporting protocols, and operational responsibilities for environmental, health and safety, community, and regulatory matters.
How the governance body or individual(s) determine whether appropriate skills and competencies are available or will be developed to oversee strategies designed to respond to sustainability-related risks and opportunities (CSDS 1 1.27-a-ii) *Affiliations: ESRS ESRS 2 GOV-1-23 (a) and (b) | IFRS-S1 S1.27-a-ii*	The Board and Technical and HSE Committee consider available technical, operational, environmental, health and safety, governance, and financial experience when overseeing sustainability-related matters. External expertise may be used where appropriate.
How and how often the body(ies) or individual(s) is informed about sustainability-related risks and opportunities (CSDS 1 1.27-a-iii)	The Company's Technical and HSE Committee, which serves as the Board's ESG oversight committee, receives quarterly reports from management regarding sustainability-related actions, plans, goals, risks, and opportunities. The Chief Executive Officer, together with senior management and designated personnel, reports to the Committee on matters relating to the Company's economic, environmental, and social impacts, including material sustainability-related developments associated with exploration activities. In addition to regular quarterly reporting, material environmental, health and safety, regulatory, or community-related matters are

	escalated to the Technical and HSE Committee and Board of Directors as required.
How the governance body or individual(s) takes into account sustainability-related risks and opportunities when overseeing: a) the entity's strategy, b) its decisions on major transactions and c) its risk management processes and related policies, including whether the body(s) or individual(s) has considered trade-offs associated with those risks and opportunities (CSDS 1 1.27-a-iv) *Affiliations: ESRS ESRS 2 GOV-1-23 (b), ESRS 2 GOV-26 (b) | IFRS-S1 S1.27-a-iv*	The Board and Technical and HSE Committee consider sustainability and climate-related matters as part of broader oversight of exploration planning, environmental management, health and safety, community relations, regulatory compliance and risk management. Formal climate scenario analysis has not been completed.
How the governance body or individual(s) oversees the setting of targets related to sustainability-related risks and opportunities and monitors progress toward those targets including whether and how related performance metrics are included in remuneration policies (CSDS 1 1.27-a-v) *Affiliations: ESRS ESRS 2 GOV-1-22 (d) | IFRS-S1 S1.27-a-v*	The Board, through the Technical and HSE Committee, oversees sustainability-related objectives and performance information where applicable. Wallbridge has not established formal sustainability or climate targets and has not formally integrated related metrics into remuneration policies.
Management's role	
What is the management's role in the governance processes, controls and procedures used to monitor, manage and oversee sustainability-related risks and opportunities (CSDS 1 1.27-b) *Affiliations: ESRS ESRS 2 GOV-1-22 (c) i, ii, iii | IFRS-S1 S1.27-b*	Management is responsible for day-to-day implementation of environmental, health and safety, community, regulatory and reporting activities. The CEO has overall management responsibility for ESG-related performance, with Board oversight through the Technical and HSE Committee.
Is the role delegated to a specific management-level position or management-level committee	Management-level position
Disclose how oversight is exercised over that position or committee	Oversight of management's sustainability-related responsibilities is exercised by the Board of Directors through the Technical and HSE Committee, which serves as the Board's ESG oversight committee. The Chief Executive Officer is responsible for management oversight of the Company's sustainability-related performance, initiatives, and reporting activities. The Technical and HSE Committee receives quarterly reports from management regarding sustainability-related actions, plans, goals, risks, and opportunities, together with updates on material matters where applicable. Through these reporting and governance processes, the Board and its committees oversee management's implementation of sustainability-related practices associated with environmental stewardship, health and safety, community relations, regulatory compliance, and operational risk management.

Disclose whether management uses controls and procedures to support the oversight of sustainability-related risks and opportunities (CSDS 1 1.27-b-ii) *Affiliations: ESRS ESRS 2 GOV-1-22 (c) i, ii, iii | IFRS-S1 S1.27-b-ii*	The Company uses governance, reporting, and operational oversight processes to support management of sustainability-related risks and opportunities associated with its exploration activities. Management oversight is supported through regular reporting processes, environmental and operational monitoring activities, regulatory compliance procedures, community engagement practices, and Board oversight through the Technical and HSE Committee. The Technical and HSE Committee receives quarterly reports regarding sustainability-related actions, plans, goals, risks, and opportunities, with material matters escalated to the Committee and Board of Directors as required. These processes support ongoing monitoring and management of environmental, health and safety, community relations, and other sustainability-related matters.
If so, how these controls and procedures are integrated with other internal functions	Sustainability-related oversight is supported through existing operational management, environmental compliance, health and safety, community relations, regulatory reporting and corporate governance processes.

Climate-related disclosures

Governance Body

Identify what governance body or individual(s) are responsible for oversight specifically of climate-related risks and opportunities (CSDS 2 2.6-a) *Affiliations: CDP W1.1 | CDSB REQ-01, REQ-02, REQ-03, REQ-05, REQ-06 | GRI 303-1 | IFRS-S2 S2.6-a | TCFD Governance | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Board composition*	Other, please specify Technical and HSE Committee (Board ESG oversight committee)
How responsibilities for climate-related risks and opportunities are reflected in the terms of reference, mandates, role descriptions and other related policies applicable to that governance body or individual(s) (CSDS 2 2.6-a-i) *Affiliations: IFRS-S2 S2.6-a-i | TCFD Governance*	The Company's Board of Directors oversees climate-related risks and opportunities as part of its broader oversight of environmental, sustainability, health and safety, and risk management matters. Specific oversight responsibilities are delegated to the Technical and HSE Committee, which serves as the Board's ESG oversight committee. Climate-related considerations are incorporated into the Company's governance and reporting processes through regular management reporting, environmental oversight activities, operational planning, and risk management discussions associated with exploration activities and future project development considerations. The Chief Executive Officer and senior management support implementation and monitoring of climate-related practices, including environmental management activities, energy management measures, regulatory compliance, and sustainability-related reporting initiatives.

How the governance body or individual(s) determine whether appropriate skills and competencies are available or will be developed to oversee strategies designed to respond to climate-related risks and opportunities (CSDS 2 2.6-a-ii) *Affiliations: IFRS-S2 S2.6-a-ii | TCFD Governance*	Wallbridge considers technical, environmental, health and safety, governance, and operational experience when overseeing sustainability-related and climate-related matters through the Board of Directors and the Technical and HSE Committee. The Company's governance bodies assess whether appropriate knowledge and expertise are available to support oversight of environmental and climate-related considerations associated with exploration activities, regulatory requirements, operational planning, and future project development activities. As climate-related reporting and regulatory expectations continue to evolve, the Company may continue to develop internal knowledge and governance capabilities related to climate-related risks, opportunities, environmental stewardship, and sustainability-related reporting practices.
How the governance body or individual(s) is informed about climate-related risks and opportunities (CSDS 2 2.6-a-iii) *Affiliations: IFRS-S2 S2.6-a-iii | TCFD Governance*	The Board of Directors and Technical and HSE Committee are informed about climate-related risks and opportunities through management reporting processes associated with environmental management, regulatory compliance, operational planning, sustainability-related reporting, and broader ESG oversight activities. The Technical and HSE Committee, which serves as the Board's ESG oversight committee, receives quarterly reports from management regarding environmental and sustainability-related matters, including climate-related considerations where applicable, together with updates on material issues as required. Climate-related information currently considered by management and the Board includes environmental regulatory developments, energy management practices, operational considerations associated with exploration activities, and potential physical climate-related impacts such as extreme weather events, wildfire conditions, and seasonal access considerations.
How often the governance body or individual(s) is informed about climate-related risks and opportunities (CSDS 2 2.6-a-iii) *Affiliations: CDP W1.2 | CDSB REQ-01, REQ-02, REQ-03, REQ-05, REQ-06 | IFRS-S2 S2.6-a-iii | TCFD Governance | WEF-MSC Pillar 1 (Expanded Metrics & Disclosures) - Principles of Governance - Risk and Opportunity Oversight - Economic, environmental and social topics in capital allocation framework*	Quarterly
How the governance body or individual(s) takes into account climate-related risks and opportunities when overseeing the entity's strategy, its decisions on major transactions and its risk management processes and related policies, including whether the body(s) or individual(s) has considered trade-offs associated with those risks and opportunities (CSDS 2 2.6-a-iv) *Affiliations: IFRS-S2 S2.6-a-iv | TCFD Governance*	The Board of Directors and Technical and HSE Committee consider climate-related risks and opportunities as part of the Company's broader environmental, sustainability, and risk management oversight processes associated with exploration activities and future project development considerations. Climate-related considerations are incorporated into management reporting, environmental oversight activities, operational planning, regulatory compliance discussions, and broader ESG-related governance processes

	where applicable. These considerations may include potential physical climate-related impacts such as extreme weather events, wildfire conditions, seasonal access constraints, energy use considerations, and evolving environmental regulatory expectations. The Board and management consider climate-related matters together with operational, financial, environmental, regulatory, and stakeholder considerations when overseeing strategic planning, exploration activities, and long-term project development objectives. As disclosed elsewhere in this report, the Company has not yet completed formal climate-related scenario analysis or quantitative assessment of climate-related financial risks.
Has the governance body or individual(s) considered trade-offs associated with those risks and opportunities, provide details	No
How the governance body or individual(s) oversees the setting of targets related to climate-related risks and opportunities (CSDS 2 2.6-a-v) *Affiliations: IFRS-S2 S2.6-a-v | TCFD Governance*	The Board of Directors, through the Technical and HSE Committee, oversees management's approach to climate-related considerations associated with environmental management, energy use, regulatory compliance, and sustainability-related reporting activities. As disclosed elsewhere in this report, the Company is continuing to develop its approach to climate-related targets, including refinement of greenhouse gas emissions reporting methodologies and related performance metrics associated with exploration activities. The Technical and HSE Committee receives regular management updates regarding sustainability-related actions, plans, goals, and environmental performance matters, including climate-related considerations where applicable. These governance and reporting processes support oversight of the Company's evolving approach to climate-related risks, opportunities, and related performance monitoring activities.
How the governance body or individual(s) monitors progress towards those targets (CSDS 2 2.6-a-v) *Affiliations: IFRS-S2 S2.6-a-v | TCFD Governance*	The Board of Directors and Technical and HSE Committee monitor management's progress on sustainability-related initiatives and environmental performance matters through regular reporting processes associated with exploration activities and ESG oversight. As disclosed elsewhere in this report, the Company is continuing to refine its approach to climate-related reporting methodologies and related performance measures, including greenhouse gas emissions reporting associated with exploration activities. The Technical and HSE Committee receives quarterly updates from management regarding sustainability-related actions, plans, environmental performance matters, and climate-related considerations where applicable. These reporting processes support

	oversight of the Company's evolving approach to climate-related risks, opportunities, and performance monitoring activities.
Are there related performance metrics	No
How are they included in remuneration policies	"Not applicable. Climate-related performance metrics are not currently integrated into remuneration policies."

Management's role

What is the management's role in the governance processes, controls and procedures used to monitor, manage and oversee climate-related risks and opportunities (CSDS 2 2.6-b) *Affiliations: CSDS S2.6-b | TCFD Governance*	Wallbridge's management team is responsible for the day-to-day oversight and implementation of processes associated with climate-related and broader sustainability-related matters relevant to the Company's exploration activities. The Chief Executive Officer has overall management responsibility for the Company's sustainability-related performance, initiatives, and reporting activities, including climate-related considerations where applicable. Senior management and designated personnel support implementation of environmental management, regulatory compliance, operational planning, and sustainability-related reporting activities. The Technical and HSE Committee, which serves as the Board's ESG oversight committee, receives quarterly reports from management regarding sustainability-related actions, plans, goals, risks, and opportunities, together with updates on material environmental and climate-related matters where applicable. Climate-related oversight processes are integrated within the Company's broader governance, operational management, environmental management, and risk management activities.
Is the role delegated to a specific management-level position or management-level committee	Management-level position
Provide the highest management-level position(s) or committee(s) with responsibility for climate-related policies, strategies and issues	Chief Executive Officer (CEO)
Nature of primary responsibility	Both assessing and managing climate-related risks and opportunities
Disclose how oversight is exercised over that position or committee	Oversight of management's responsibilities for climate-related risks and opportunities is exercised by the Board of Directors through the Technical and HSE Committee, which serves as the Board's ESG oversight committee.

	The Chief Executive Officer is responsible for management oversight of sustainability-related and climate-related matters associated with the Company's exploration activities, including environmental management, regulatory compliance, and sustainability-related reporting activities. The Technical and HSE Committee receives quarterly reports from management regarding sustainability-related actions, plans, goals, risks, and opportunities, together with updates on material environmental and climate-related matters where applicable. Climate-related oversight activities are integrated within the Company's broader governance, environmental management, operational planning, and risk management processes.
Disclose whether management uses controls and procedures to support the oversight of climate-related risks and opportunities (CSDS 2 2.6-b-ii) *Affiliations: CSDS S2.6-b-ii | TCFD Governance*	The Company uses governance, reporting, environmental management, and operational oversight processes to support management's oversight of climate-related and broader sustainability-related matters associated with exploration activities. Climate-related considerations are incorporated into existing environmental management, regulatory compliance, operational planning, and sustainability-related reporting activities where applicable. Management oversight is supported through established reporting structures, environmental monitoring activities, and regular communication between operational personnel, senior management, and the Technical and HSE Committee. As disclosed elsewhere in this report, the Company continues to develop and refine its approach to climate-related reporting, performance measurement, and broader sustainability governance practices.
If so, how these controls and procedures are integrated with other internal functions	Climate-related oversight processes at Wallbridge are integrated within existing environmental management, operational planning, regulatory compliance, sustainability-related reporting, and broader risk management activities associated with exploration operations. Climate-related considerations, where applicable, are communicated through established reporting structures involving operational personnel, environmental management functions, senior management, and the Technical and HSE Committee. These processes support coordination between environmental, operational, regulatory, and governance-related functions associated with the Company's exploration activities and future project development considerations. As disclosed elsewhere in this report, the Company continues to develop and refine its

	broader approach to climate-related governance, reporting, and performance measurement activities.

Policy commitments

Provide a description of the organization's policy commitments for responsible business conduct (GRI 2-23-a) *Affiliations: ESRS ESRS 2 GOV-4; MDR-P-65 (b) to (c) and (f), G1-1-7 and AR 1 (b), S1-1-19 to 21, AR 14, S2-1-16 to 17, 19, and AR 16, S3-1-14, 16 to 17 and AR 11, S4-1-15 to 17, AR 13 | GRI 102-16 | IPIECA C2 GOV-1 | SASB EM-MM-501a.2, EM-MM-510a.1 | UN SDGs 16 (16.3)*	Wallbridge maintains corporate policies supporting responsible business conduct, including its Code of Business Conduct and Ethics, Insider Trading Policy, and Anti-Bribery Policy. These policies establish expectations for ethical conduct, compliance, confidentiality, conflicts of interest and responsible business practices.
Are the policy commitments publicly available (GRI 2-23-c) *Affiliations: UN SDGs 16 (16.3)*	Yes
Provide links to the policy commitments, if publicly available, or, if the policy commitments are not publicly available, explain the reason for this (GRI 2-23-c) *Affiliations: UN SDGs 16 (16.3)*	Please see the links below for access to the Company's policy commitments: Safety, Health, Environment and Community (SHEC) Policy Board Diversity Policy Majority Voting Policy Code of Business Conduct and Ethics
Were the policy commitments approved at the most senior level within the organization (GRI 2-23-d) *Affiliations: ESRS ESRS 2 GOV-4; MDR-P-65 (c) and (f), G1-1-7; AR 1 (b), S1-1-19 to 21; AR 14, S2-1-16 to 17, 19; AR 16, S3-1-14, 16 to 17; AR 11, S4-1-15 to 17; AR 13 | UN SDGs 16 (16.3)*	Yes

Governance structure and composition

Describe the governance structure, including committees of the highest governance body (e.g. the Board of Directors, the Executives, the Board Environment Committee, Board Safety Committee, the Advisory Committee, etc.) (GRI 2-9-a) *Affiliations: CDSB REQ-01 | ESRS ESRS 2 GOV-1-21, 22 (a), 23, ESRS G1-5 (b) | GRI 102-22, 405-1 | IPIECA A1 GOV-1, C1 GOV-1 | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	As of the 2025 Annual General Meeting, Wallbridge's Board was composed of six members and maintained four standing committees: Audit; Compensation and Human Resources; Technical and HSE; and Corporate Governance and Nominating. These committees support Board oversight of financial, governance, technical, health and safety, environmental and compensation matters.

Identify and list the committees of the highest governance body that are responsible for decision making and overseeing the management of the organization's impacts on the economy, environment and people including the oversight of sustainability-related risks and opportunities (e. g. Board level Environment Committee, Safety Committee, ESG Committee, Advisory Committee, etc.) (GRI 2-9-b) *Affiliations: Bloomberg CSR_SUSTAINABILITY_COMMITTEE | CDSB REQ-01 | ESRS ESRS 2 GOV-1-21, 22 (a), 23, ESRS G1-5 (b) | GRI 102-22, 405-1 | IFRS-S1 S1.27-a | IPIECA A1 GOV-1, C1 GOV-1 | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	The Board of Directors oversees the Company's economic, environmental, and social impacts through its governance structure and standing committees. The Technical and Health, Safety and Environment (HSE) Committee serves as the Board's primary committee responsible for oversight of sustainability-related matters, including environmental management, health and safety, community relations, and sustainability-related risks and opportunities associated with the Company's exploration activities. Technical and HSE Committee Charter

Less than 3 years of tenure of members on the governance body	1
3-6 years of tenure of members on the governance body	3
6-9 years of tenure of members on the governance body	2
More than 10 years of tenure of members on the governance body	0
Number of other significant positions and commitments held by each member, and the nature of the commitments	Please find additional details on our current board members at the link below. For information on previous board members please contact the Company. Board of Directors
Number of Male governance body members	4
Number of Female governance body members	2
Number of Non-Binary governance body members	0
Number of Gender not disclosed governance body members	0
Number of members from under-represented social groups	0
Description of competencies relating to economic, environmental, and social topics	Please find additional details on our board members at the link above.

Description of stakeholder representation, including employees and other workers	Other stakeholders are actively engaged in topics they have expertise in. Members of management attend quarterly board meetings and committee meetings as needed.

Highest Governance Body

Describe the nomination and selection processes for the highest governance body and its committees (GRI 2-10-a) *Affiliations: CDSB REQ-01 | GRI 102-24 | IPIECA A1 GOV-1 | UN SDGs 16 (16.7), 5 (5.5) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	For information regarding the nomination and governance processes please refer to the Company's Corporate Governance and Nominating Committee Charter available at the link below: Corporate Governance and Nominating Committee Charter
Does the organization have a diversity policy, gender equality or gender equity plan and if so, provide details, link to the policy or attach the file (ONYEN) *Affiliations: GRI 14.21.5 | IPIECA A1 GOV-1, C1 GOV-1*	Wallbridge has adopted a Board Diversity Policy that supports diversity and inclusion within the Company's governance structure and Board composition processes. The policy outlines the Company's approach to considering diversity, including gender diversity, in Board nomination and appointment processes. Additional information is available in the Company's Board Diversity Policy at the link below: Board Diversity Policy
Report the criteria used for nominating and selecting highest governance body members (GRI 2-10-b) *Affiliations: CDSB REQ-01 | GRI 102-24 | IPIECA A1 GOV-1 | UN SDGs 16 (16.7), 5 (5.5) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	The nomination and selection of members of the Board of Directors are guided by criteria established by the Corporate Governance and Nominating Committee (CG&N Committee). These criteria include consideration of competencies, skills, experience, independence, integrity, governance experience, and the collective expertise required to effectively oversee the Company's technical, operational, financial, environmental, health and safety, and sustainability-related activities. Additional information regarding the nomination and selection criteria is available in the Company's Corporate Governance and Nominating Committee Charter at the link below: Corporate Governance and Nominating Committee Charter
Are views of stakeholders (including shareholders) taken into consideration for nominating and selecting highest governance body members (GRI 2-10-b-i)	Yes
Discuss how views of the stakeholders (including shareholders) are taken into consideration for nominating and selecting highest governance body members	The Board of Directors and the Corporate Governance and Nominating Committee consider a broad range of perspectives, including stakeholder and shareholder interests, when evaluating and selecting potential director candidates. Consideration is given to Board composition, diversity, experience, governance expertise, technical competencies, and the ability of prospective directors to support effective oversight of the Company's business activities, stakeholder relationships, and sustainability-related matters.
Is diversity taken into consideration for nominating and selecting highest governance body	Yes

members (GRI 2-10-b-ii)	
Discuss how diversity is considered for nominating and selecting highest governance body members	Wallbridge considers diversity as part of the nomination and selection process for members of the Board of Directors. The Board and the Corporate Governance and Nominating Committee consider a broad range of perspectives, backgrounds, skills, experience, and qualifications when evaluating potential director candidates, including diversity considerations and stakeholder perspectives. Additional information regarding the Company's approach to Board diversity is available in the Board Diversity Policy at the link below: Board Diversity Policy
Is independence taken into consideration for nominating and selecting highest governance body members (GRI 2-10-b-iii)	Yes
Discuss how independence is considered for nominating and selecting highest governance body members	Wallbridge considers director independence as part of the nomination and selection process for members of the Board of Directors. The Company seeks to maintain a Board composed of individuals with diverse knowledge, experience, skills, gender, and backgrounds, while ensuring that a majority of directors meet the independence requirements of applicable Canadian securities legislation, regulatory guidance, and Toronto Stock Exchange requirements. The Corporate Governance and Nominating Committee regularly reviews Board composition, size, and independence to support effective oversight, governance, and decision-making across the Company's business and sustainability-related activities.
Discuss whether and how competencies relevant to the impacts of the organization are considered (GRI 2-10-b-iv) *Affiliations: IPIECA A1 GOV-1 | WDI Section 1: Governance - Direct Operations and Supply Chain*	As part of its mandate, the Corporate Governance and Nominating Committee (CG&N Committee) oversees Board renewal and the nomination of directors, including consideration of the competencies, skills, experience, and qualifications required to effectively oversee the Company's technical, operational, environmental, health and safety, governance, and sustainability-related activities. The CG&N Committee considers the collective expertise and experience of the Board to support effective oversight of the Company's business activities, risks, stakeholder relationships, and long-term strategic objectives. Additional information is available in the Company's Corporate Governance and Nominating Committee Charter previously linked.

Chair of the highest governance body

Is the chair of the highest governance body also a senior executive in the organization (non-independent) (GRI 2-11-a) *Affiliations: Bloomberg INDEPENDENT_CHAIRPERSON | CDSB REQ-01 | GRI 102-22, 405-1 | IPIECA A1 GOV-1, C1 GOV-1 | UN SDGs 16 (16.6) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	No

Conflicts of Interest

Describe the processes for the highest governance body to ensure that conflicts of interest are prevented and mitigated (GRI 2-15-a) *Affiliations: CDSB REQ-01 | GRI 102-25, 405-1 | UN SDGs 16 (16.6) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	The Corporate Governance and Nominating Committee oversees the Code of Business Conduct and Ethics, which addresses disclosure and management of potential conflicts of interest involving directors, officers, employees and applicable business relationships.
Are conflicts of interest disclosed to stakeholders (GRI 2-15-b) *Affiliations: CDSB REQ-01 | GRI 102-25, 405-1 | UN SDGs 16 (16.6) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	Yes
Are there conflicts of interest related to: cross-board membership	No
Are there conflicts of interest related to: cross-shareholding with suppliers and other stakeholders	No
Are there conflicts of interest related to: existence of controlling shareholder	No
Are there conflicts of interest related to: related parties, their relationships, transactions, and outstanding balances	No

Collective knowledge of highest governance body

Report measures taken to advance the collective knowledge, skills and experience of the highest governance body on sustainable development. (e.g. board training) (GRI 2-17-a) *Affiliations: CDSB REQ-01 | ESRS ESRS 2 GOV-1-23 | GRI 102-27 | IPIECA A1 GOV-1, A6 GOV-1, C1 GOV-1 | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Quality of Governing Body - Governance body composition*	Board knowledge of sustainability-related matters is supported through Technical and HSE Committee oversight, management reporting, and periodic review of environmental, health and safety, technical and community-related matters relevant to exploration activities.

Evaluation of Highest Governance Body

Describe actions taken in response to the evaluations, including changes to the composition of the highest governance body and organizational practices (GRI 2-18-c) *Affiliations: CDSB REQ-01 | GRI 102-28 | IPIECA C1 GOV-1, C5 GOV-1 | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1 - Principles of Governance - Quality of Governing Body - Governance body composition*	The Corporate Governance and Nominating Committee (CG&N Committee) regularly evaluates the effectiveness and contribution of the Board of Directors, its committees, and individual directors through verbal discussions, Board and committee meetings, and confidential written questionnaires. Feedback obtained through these evaluation processes is used to support ongoing review of Board composition, committee structure, governance practices, and the competencies and experience required to support effective oversight and decision-making. The CG&N Committee also reviews the size, composition, and leadership of Board committees as part of its governance oversight responsibilities.

Transparency

Describe the role of the highest governance body and of senior executives in developing, approving and updating the organization's purpose, value or mission statements, strategies, policies and goals related to sustainable development (GRI 2-12-a) *Affiliations: CDSB REQ-01 | ESRS ESRS 2 GOV-1-22 (c); GOV-2-26 (a) to (b); SBM-2-45 (d), ESRS G1-5 (a) | GRI 102-26 | IPIECA C1 GOV-2 | SASB EM-EP-510a.2 | UN SDGs 16 (16.7) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Governing Purpose - Setting Purpose*	The Board of Directors is responsible for overseeing the management and strategic direction of the Company, including oversight of policies, objectives, and governance practices related to sustainable development, environmental stewardship, health and safety, and community relations. Senior management, led by the Chief Executive Officer, is responsible for implementing the Company's strategies, operational practices, and sustainability-related initiatives and for reporting to the Board and the Technical and HSE Committee regarding related actions, plans, risks, and performance matters. The Technical and HSE Committee supports the Board in overseeing sustainability-related

	matters associated with the Company's exploration activities and broader environmental, health and safety, and governance responsibilities.
Describe the role of the highest governance body in overseeing the organization's due diligence and other processes to identify and manage the organization's impacts on the economy, environment and people (GRI 2-12-b) *Affiliations: CDSB REQ-01 | ESRS ESRS 2 GOV-1-22 (c); GOV-2-26 (a) to (b); SBM-2-45 (d), G1-5 (a) | GRI 102-22, 405-1 | IPIECA A1 GOV-1, C1 GOV-1 | UN SDGs 16 (16.7) | WDI Section 1: Governance - Direct Operations and Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Risk and Opportunity Oversight - Economic, environmental and social topics in capital allocation framework*	Wallbridge's Board of Directors oversees the Company's due diligence, governance, and risk management processes associated with its economic, environmental, and social impacts. The Board is responsible for overseeing strategic planning, business risks, operational performance, governance practices, ethics and integrity, succession planning, and management oversight. This includes review and approval of the Company's business plans, operating and capital budgets, governance structures, corporate policies, and performance objectives. The Board also oversees the Company's approach to corporate governance, environmental stewardship, health and safety, sustainability-related matters, and ethical business conduct through its committee structure, including the Technical and HSE Committee and the Corporate Governance and Nominating Committee. Senior management, led by the Chief Executive Officer, is responsible for implementing operational controls, risk management activities, environmental and community engagement practices, and sustainability-related initiatives associated with the Company's exploration activities. The Board and its committees receive regular reports from management regarding operational, environmental, governance, health and safety, and sustainability-related matters to support oversight and decision-making activities.
Does the highest governance body engage with stakeholders to support due diligence and other processes (GRI 2-12-b-i)	No
Describe how the highest governance body considers the outcomes of these processes (GRI 2-12-b-ii) *Affiliations: ESRS ESRS 2 GOV-1-22 (c); GOV-2-26 (a) to (b); SBM-2-45 (d), G1-5 (a) | UN SDGs 16 (16.7) | WEF-MSC Pillar 1: Principles of Governance - Risk and Opportunity Oversight - Economic, environmental and social topics in capital allocation framework*	The Board of Directors generally delegates day-to-day stakeholder engagement activities and related due diligence processes to senior management as part of the Company's operational and governance practices. Management is responsible for engaging with stakeholders, including Indigenous communities, regulators, employees, contractors, and other parties relevant to the Company's exploration activities, and reports material matters, risks, concerns, and engagement outcomes to the Board and its committees on an ongoing basis and as required. Through these reporting and governance processes, the Board considers stakeholder-related information and due diligence

	outcomes as part of its oversight of governance, operational, environmental, community relations, and sustainability-related matters.

Ethics

Ethics and Integrity

Describe how individuals can seek advice on implementing the organization's policies and practices for responsible business conduct (GRI 2-26-a-i) *Affiliations: ESRS G1-1-10 (a); G1-3-18 (a), S1-3-AR 32 (d), S2-3-AR 27 (d), S3- 3-AR 24 (d), S4-3-AR 24 (d) | GRI 102-17 | SASB EM-MM-501a.2, EM-MM-510a.1 | UN SDGs 16 (16.3) | WEF-MSC Pillar 1 - Principles of Governance - Ethical Behaviour - Protected ethics advice and reporting mechanisms*	Wallbridge provides guidance regarding responsible business conduct through its Code of Business Conduct and Ethics and related corporate policies and governance practices. Employees, officers, and directors may seek guidance and direction from management, supervisors, senior executives, or appropriate governance representatives regarding the interpretation and implementation of the Company's policies, ethical standards, legal obligations, and responsible business practices. The Company's governance framework also supports oversight of compliance with applicable legal, regulatory, and ethical requirements through management reporting and Board oversight processes.
Describe the mechanisms for individuals to raise concerns about the organization's business conduct (GRI 2-26-a-ii) *Affiliations: Bloomberg EMP_PROT_WHISTLE_BLOWER_POLICY | ESRS G1-1-10 (a), G1-3-18 (a), S1-3-AR 32 (d), S2-3-AR 27 (d), S3- 3-AR 24 (d), S4-3-AR 24 (d) | GRI 102-17 | SASB EM-MM-501a.2, EM-MM-510a.1 | UN SDGs 16 (16.3) | WEF-MSC Pillar 1 - Principles of Governance - Ethical Behaviour - Protected ethics advice and reporting mechanisms*	Wallbridge provides reporting channels for concerns regarding business conduct, ethics, legal compliance, accounting, internal controls, or auditing matters. Concerns may be raised through management channels or confidential/anonymous reporting contacts, including the Chair of the Audit Committee or external legal counsel. No critical concerns were communicated to the Board during the reporting period.

Compliance with laws and regulations

Report the total number of significant instances of non-compliance with laws and regulations that occurred during the reporting period and a breakdown of this total by (GRI 2-27-a) *Affiliations: ESRS E2-4-AR 25 (b), ESRS 2 SMB-3-48 (d), G1-4-24 (a), S1-17 -103 (c) to (d) and 104 (b) | WEF-MSC Pillar 1: Ethical Behaviour - Monetary losses from unethical behaviour*	0
Number of instances for which fines were incurred	0
Number of instances for which non-monetary sanctions were incurred	0

Describe the organization's approach to stakeholder engagement, including frequency of engagement by type (GRI 2-29-a) *Affiliations: CDSB REQ-03 Risks and Opportunities | ESRS ESRS 2 SMB-2-45 (a) i to (a) iv, S1-1-20 (b), S1-2-25, 27 (e) and 28, S2-1-17 (b), S2-2-20, 22 (e) and 23, S3-1-16 (b); S3-2-19, 21 (d) and 22, S4-1-16 (b); S4-2-18, 20 (d) and 21 | GRI 102-40 | IPIECA A4 GOV-1, A4 GOV-2, C4 GOV-2 | SASB EM-EP-510a.2 | WDI Section 11: Supply Chain Transparency - Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Stakeholder engagement - Material issues impacting stakeholders*	Wallbridge engages with stakeholders relevant to its exploration activities, including investors, shareholders, Indigenous communities, local communities, regulators, employees and contractors. Engagement occurs through investor relations, public disclosure, meetings, consultations, operational updates and community relations activities.
Provide a list of stakeholder groups engaged by the organization (GRI 2-29-a) *Affiliations: CDSB REQ-03 Risks and Opportunities | ESRS ESRS 2 SMB-2-45 (a) i to (a) iv, S1-1-20 (b), S1-2-25, 27 (e) and 28, S2-1-17 (b), S2-2-20, 22 (e) and 23, S3-1-16 (b); S3-2-19, 21 (d) and 22, S4-1-16 (b); S4-2-18, 20 (d) and 18 | GRI 102-40 | IPIECA A4 GOV-1, A4 GOV-2 | SASB EM-EP-510a.2 | WDI Section 11: Supply Chain Transparency - Supply Chain | WEF-MSC Pillar 1: Principles of Governance - Stakeholder engagement - Material issues impacting stakeholders*	• Permanent or Full-time Employees • Investors • Local communities • Regulatory authorities • Suppliers and contractors • Local government bodies • Consultants (professional services)
Describe how the organization seeks to ensure meaningful engagement with stakeholders (GRI 2-29-a-iii) *Affiliations: CDSB REQ-03 Risks and Opportunities | ESRS ESRS 2 SMB-2-45 (a) i to (a) iv, S1-1-20 (b), S1-2-25, 27 (e) and 28, S2-1-17 (b), S2-2-20, 22 (e) and 23, S3-1-16 (b); S3-2-19, 21 (d) and 22, S4-1-16 (b); S4-2-18, 20 (d) and 20 | GRI 102-40*	Wallbridge seeks meaningful engagement through ongoing communication, meetings, consultation and community relations activities. Stakeholder feedback is considered in operational planning, environmental management, permitting and community relations where relevant, and management engages directly where concerns are raised.

Tax

Provide a description of the approach to tax (GRI 207-1-a) *Affiliations: GRI 14.23.4 | SASB EM-MM-510a.1 | UN SDGs 1 (1.1), 1 (1.3), 10 (10.4), 17 (17.1), 17 (17.3)*	Wallbridge's approach to tax is based on compliance with applicable tax laws and regulations, responsible governance and accurate financial reporting. Tax matters are managed within the Company's financial management and governance processes.
Does the organization have a tax strategy (GRI 207-1-a-i) *Affiliations: GRI 14.23.4 | SASB EM-MM-510a.1 | UN SDGs 1 (1.1), 1 (1.3), 10 (10.4), 17 (17.1), 17 (17.3)*	No
The approach to regulatory compliance	Wallbridge is committed to complying with applicable tax laws, rules, and regulations in the jurisdictions in which it operates. The Company's governance framework, Code of Business Conduct and Ethics, and financial management practices support compliance with applicable legal and regulatory obligations. While employees, officers, and directors are not expected to possess detailed knowledge of all tax requirements, they are expected to seek guidance from appropriate internal personnel or external advisors where necessary. The Company engages third-party professional expertise to support management of complex tax matters and significant transactions where appropriate.
How the approach to tax is linked to the business and sustainable development strategies of the organization	Wallbridge seeks to comply with applicable tax laws and regulatory requirements. Tax-related matters are managed through financial controls, management oversight and external advisors where appropriate, supporting the Company's broader commitment to ethical business conduct and responsible governance.
Provide a description of the tax governance and control framework (GRI 207-2-a) *Affiliations: GRI 14.23.5 | SASB EM-MM-230a.1, EM-MM-230a.1 | UN SDGs 1 (1.1), 1 (1.3), 10 (10.4), 17 (17.1), 17 (17.3)*	The Company's tax governance and control framework is integrated within the Company's broader financial management, regulatory compliance, and corporate governance processes. Oversight responsibilities are shared between senior management, including the Chief Executive Officer and Chief Financial

	Officer, with support from external professional advisors where appropriate. The Company's approach to tax governance emphasizes compliance with applicable laws and regulations, oversight of financial reporting processes, management of tax-related risks, and use of external expertise for complex matters and significant transactions.
The governance body or executive-level position within the organization accountable for compliance with the tax strategy	The Chief Financial Officer is primarily responsible for oversight of tax compliance and related legal and regulatory requirements. The Chief Executive Officer and Chief Financial Officer oversee the Company's broader financial control framework and governance processes associated with tax-related matters.
How the approach to tax is embedded within the organization	Tax-related considerations are integrated within the Company's financial management, governance, and operational decision-making processes. Senior management, including the Chief Executive Officer and Chief Financial Officer, are involved in oversight of material tax-related matters, with support from external tax, legal, and financial advisors where specialized expertise is required.
The approach to tax risks, including how risks are identified, managed, and monitored	Wallbridge maintains a conservative approach to tax risk management and seeks to comply with applicable tax laws and regulatory requirements in the jurisdictions where it operates. Tax-related risks are managed through internal financial controls, management oversight, engagement of qualified external advisors, and review processes associated with material transactions and financial reporting activities.
Provide a description of the mechanisms for reporting concerns about unethical or unlawful behaviour and the organization's integrity in relation to tax (GRI 207-2-b) *Affiliations: GRI 14.23.5 | SASB EM-MM-230a.1, EM-MM-230a.2 | UN SDGs 1 (1.1), 1 (1.3), 10 (10.4), 17 (17.1), 17 (17.3)*	Wallbridge maintains a conservative approach to tax risk and manages tax-related matters through internal controls, management oversight and external advisors where appropriate. Concerns regarding tax, accounting, internal controls, auditing or financial reporting may be raised under the Whistleblower Policy, including confidential or anonymous reporting where applicable.
Provide a description of the assurance process for disclosures on tax and, if applicable, a reference to the assurance report, statement, or opinion (GRI 207-2-c) *Affiliations: GRI 14.23.5 | SASB EM-MM-230a.1, EM-MM-230a.2 | UN SDGs 1 (1.1), 1 (1.3), 10 (10.4), 17 (17.1), 17 (17.3)*	Tax-related disclosures are included within the Company's annual financial statements and related financial reporting documents, which are subject to audit by an independent external public accounting firm in accordance with applicable financial reporting and auditing standards.
